Perceptive Solutions Announces the Launch of the WoundZoom PRO Application for Wound Care

STEVENS POINT, WI, UNITED STATES, February 1, 2024 /EINPresswire.com/ -- Perceptive Solutions, Inc., maker of WoundZoom Wound Centric EMR and point of application app, today announces the launch of WoundZoom PRO, an advanced application that gives healthcare providers a more intelligent and efficient way to manage wound care across a variety of care settings with its non-contact three dimensional wound measurement technology and intuitive workflow application that can all be accessed on a clinician's smart device.

“WoundZoom PRO exemplifies cutting-edge sophistication through its innovative AI algorithm, meticulously measuring the intricacies of wound topography to consistently identify and gauge the deepest point. The method of action is easy; requiring merely seconds of imaging to deliver unparalleled accuracy and a better patient experience. With a suite of refined features, the application seamlessly transforms any practice into a realm of optimized efficiency.” said Mark Lacerte, President of Perceptive Solutions.

“At Perceptive, we cultivate an innovative culture committed to delivering superior solutions for healthcare professionals in wound care. Anchored by our four core user benefits, WoundZoom PRO exemplifies our dedication to excellence.”

WoundZoom PRO is the latest HIPAA-compliant digital wound management solution by Perceptive. WoundZoom seamlessly integrates into the provider's EHR through a cloud-based portal, which produces practice analytics and census reports on demand. The WoundZoom system is valued to elevating clinical and business outcomes.

The new solution is available for download on the Apple App Store with application access granted with a user license.

About Perceptive Solutions

Perceptive Solutions modernizes the practice of wound care with technology-enabled systems designed to increase clinical efficiency, improve care quality, and mitigate risk. Integrating smoothly with your EHR, WoundZoom utilizes intuitive diagnostic, AI, to capture accurate 2D and 3D images, automatically prompt and document appropriate actions, and create a continuous, standardized clinical record across shifts, floors, and facilities.
