

Value-Optimized Solutions, Inc. Launches new Press Release Service World Wide

/EINPresswire.com/ Austin, TX, October 03, 2012 -- Value-Optimized Solutions, Inc. ("[VOS](#)") the world leader in process optimization launches world-wide service for Press Releases.

The new service is available online to more than 183 countries and 127 languages positioning VOS as one of the most prominent new entrants in the highly competitive press release business space.

"This world-wide production release marks the beginning of a new series of online services as part of a set of global strategic initiatives at VOS with the purpose of enhancing and extending the global influence of our company in the technology service space", as explained by Vijayan Shanmugam -chief operations officer at VOS- during a private shareholders internationally speaking event held during July 2012. The event was hosted in Austin (TX, USA) and it was simultaneously transmitted to three different continents and it included the presence of more than 40 attendees from company investors, executives, technology partners and selected VOS personnel.

Company representatives at VOS indicated that the company is now engaged in generating the right global partnerships in order to ensure the immediate adoption of this new online service in the press release workspace.

Value-Optimized Solutions, Inc. [VOS] is a next generation business solutions service company headquartered in Austin, Texas, and formed by a group of technical professionals each with more than 25 years of extensive experience in all areas of Business, such as: [Business Management](#), Business Analysis, Professional Services, Business Intelligence, Business Process Management, Project Management, Statistical Analysis and Business Metrics, and Business Planning. Many of our principals have years of experience as Senior Research and Development Managers, Department Managers, and Corporate Managers and Directors delivering advanced business solutions.

Value-Optimized Solutions personnel complement their Business experience with technical knowledge in the fields of Mathematics, Computer Science, Physics, Neural Networks, Bio-informatics, Applied Genetics, Complex Systems Theory and Collaborative Intelligence backed up with an individual average of 20+ years of Research and Development work done in both Academic and Industrial environments.
