IT Governance delivers free DPA Assessment with every Cyber Security Gap Analysis booked in December

/EINPresswire.com/ IT Governance, the global leader in ISO27001 consultancy, training, books and tools is going to provide a free, on-site Data Protection Act (DPA) Assessment with every ISO 27001 Feasibility and Gap Analysis Service booked by 24th December 2012.. With prices starting from as little as £950, the Gap Analysis is to be delivered in December or January, anywhere in the UK. Find out more at www.itgovernance.co.uk/ISO27001-feasibility-and-gap-analysis-service.aspx.

This is an exceptional offer for any organisation in the UK that needs to assess whether they have appropriate information security controls in place. Not only will they find out where their cybersecurity gaps are, but they will also receive a free, on-site assessment and report to show whether the organisation is complying with the Data Protection Act. DPA-compliance is mandatory for every organisation in the UK which handles customers' data.

The ISO 27001 Feasibility and Gap Analysis Service aims to help businesses establish how effective their cybersecurity defences are and how close they are to ISO27001-certification readiness. The service also helps senior managers justify IT expenditure in terms of ROI, providing them with a business case for closing their cybersecurity gaps and, if relevant, pursuing ISO27001 certification.

ISO/IEC 27001 is the internationally recognised standard for effective information security management. An organisation could gain significant competitive advantage through early certification. Moreover, ISO27001 implementation reduces real risks of significant cyberloss, reputation damage and compliance failure. It demonstrates to customers, stakeholders and the Government that an organisation has information security under control.

The ISO 27001 Feasibility and Gap Analysis Service provides a combination of critical security information and financial benefits analysis, using a fixed-price approach based on the size of the organisation.

Further information about the ISO 27001 Feasibility and Gap Analysis Service is available online, from www.itgovernance.co.uk/ISO27001-feasibility-and-gap-analysis-service.aspx . You can also discuss options and timings directly with the friendly, helpful IT Governance service centre team on telephone number +44 (0)845 070 1750.

NOTES TO EDITORS

IT Governance Ltd is the single source provider of books, tools, training and consultancy for IT governance, risk management and compliance. It is a leading authority on ISO27001, data security and IT governance for business and the public sector. IT Governance is 'non-geek', approaching IT issues from a non-technology background and talking to management in its own language. Its customer base spans Europe, the Americas, the Middle East and Asia. More information is available at www.itgovernance.co.uk.
