Aecooly to Showcase Its New Personal Cooling Lineup at IFA Berlin 2026

Cold Air Series takes Aecooly's personal cooling range in a new direction

HONG KONG, September 3, 2026 /EINPresswire.com/ -- Aecooly will present its new personal cooling lineup at IFA Berlin from September 4 to 8 at Messe Berlin, booth H7.2b-117.

The presentation will include the Cold Air Series, which combines airflow with fine mist to create a cooling experience for individual users. The series reflects Aecooly's continued work on products designed for hot-weather comfort.

The personal cooling display will also feature the newly launched AirGimbal, the Air Mate modular phone fan and the Click magnetic neck fan, along with other Aecooly products.

Cold Air Series: A New Approach to Personal Cooling

The Cold Air Series combines airflow with fine mist to provide a more immediate cooling sensation than airflow alone. It adds mist-based cooling to Aecooly's wider range of personal cooling products.

According to Aecooly's testing, Cold Air Ultra can reduce perceived temperature by approximately 10°C within 10 seconds. The result is based on Aecooly's internal testing. Aecooly plans to continue exploring how mist-based cooling can be used in personal cooling products and to apply the approach to future products.

Award-Winning Product Design

Aecooly's products have received recognition across several generations. The Aero Series received a 2025 Red Dot Award and an iF Design Award. In 2026, the Cold Air Series received a Red Dot Award, while AirGimbal received both an iF Design Award and a Red Dot Award. The awards cover different stages of Aecooly's product development, from the Aero Series to Cold Air and AirGimbal. Together, they reflect the brand's continued attention to product design and everyday use.

Visit Aecooly at IFA 2026
Media representatives and guests are invited to visit Aecooly's booth to learn more about its latest products and future direction.
Dates: September 4-8, 2026
