An unusual discovery has revealed a prostate supporting food that is also so sexually potent, priests were forbidden to eat it.

"Saw palmetto, beta sitosterol, lycopene and other popular supplements are not enough for most men suffering from prostatitis and [enlarged prostate symptoms](#)," says Ben Settle, an early prostate pain sufferer and author of "The 21 Day Prostate Fix." "People are spending hundreds of dollars per year on these flavor-of-the-month prostate supplements and popping prescription drugs like they're candy. Yet, there's this cheap food at your local grocery store that not only helps relieve prostate symptoms, but is also a natural sex drive booster so effective, certain ancient celibate priests were not even allowed to eat it."

Ben will show your audience what this super food is, as well as:

- * Why saw palmetto may not be the prostate "panacea" it's hyped up to be
- * Why even "health nuts" have prostate pain in the 21st century
- * How drinking water can hurt your prostate
- * Cheap [prostate cancer prevention](#) that makes good "cents"
- * The [prostate gland pain](#) apocalypse of the 21st century

For more information , and to find out more about this prostate healing 'super food' visit Ben's site, Prostate Problems Fixed today at <http://prostateproblemsfixed.com>

Prostate Problems Fixed came about as the results of the personal experiences of Ben Settle as he dealt with a variety of prostate problems.
