# Astrikos AI Recognised with BW Chief Data and AI Officers Awards 2026 AI ML Driven Data Solution of the Year 2026 Award

*Astrikos AI has been recognised with the AI/ML Driven Data Solution of the Year Award at the 2nd edition of the BW Chief Data & AI Officers Awards 2026*

BENGALURU, KARNATAKA, INDIA, September 3, 2026 /EINPresswire.com/ -- Astrikos AI has been recognised with the AI/ML Driven Data Solution of the Year Award at the 2nd edition of the BW Chief Data & AI Officers Conclave & Awards 2026, organised by BW Businessworld. The award was presented during a live on-stage felicitation at Taj MG Road, Bengaluru.

The recognition marks an important milestone for the team and acknowledges its contribution to the evolving data and AI ecosystem.
A sincere thank you to our employees, partners, customers, and Investors for their continued support, collaboration, and trust. This achievement is a reflection of the collective efforts and contributions of everyone who has been part of the journey.

Dr. Chinmay Hegde, CEO & Managing Director, Astrikos AI said “Data centers, smart cities, and industrial systems increasingly depend on real-time intelligence. AI/ML helps turn complex operational data into actionable insights for better monitoring, prediction, and decision-making. This recognition reflects the team’s continued work in applying AI/ML to real-world infrastructure challenges,”

The award reflects the growing role of AI and ML in addressing real-world challenges across the infrastructure and technology landscape. The recognition also highlights how these technologies are increasingly being applied to improve operational efficiency, decision-making, and the development of practical solutions.As AI adoption continues to evolve, such recognition underscores the importance of translating technological innovation into meaningful and

measurable outcomes. It also points to the increasing relevance of AI/ML in shaping the future of data-driven operations.

Ali Sadhik Shaik, SVP, Product & Market Strategy, Astrikos AI added “AI and ML are increasingly important to product development and ideation, helping us turn ideas into practical, scalable solutions. They enable us to accelerate innovation and build for evolving needs. Being recognised with the AI/ML Driven Data Solution of the Year Award is an important milestone for our team and our work in this space.”

As AI and ML continue to evolve, their role is expanding beyond experimentation to practical applications across industries. Organisations are increasingly exploring how these technologies can support better use of data, improve operational processes, and address specific business and infrastructure challenges. At the same time, AI/ML is influencing how products are conceptualised, developed, and scaled, creating new opportunities to connect technology with real-world requirements. The focus is increasingly shifting towards practical implementation, measurable outcomes, and solutions that can adapt to evolving needs.

Sudarshan Shiman, Chief strategy officer, Astrikos AI added “AI and ML are changing the way we think about building and scaling solutions. The focus is not just on adopting new technologies, but on using them to solve real operational challenges and create measurable impact.

About Astrikos AI
Headquartered in Bengaluru, India, Astrikos is an infrastructure intelligence company focused on helping organizations monitor, predict, and optimize critical systems in real time. The company delivers AI-driven solutions across large-scale environments such as smart cities, data centers, public infrastructure, utilities, transport systems, and industrial operations, supporting more efficient decision-making.
Astrikos has been part of several infrastructure projects, including state-level smart city platforms, the New Indian Parliament complex, and infrastructure initiatives in the Middle East. By bringing together data from sensors, systems, and operational centers, Astrikos helps governments and enterprises improve efficiency, reduce costs, enhance security, and accelerate digital transformation.
