The Water Leak Detectors Expands Non-Invasive Leak Detection Across Seven Central Florida Counties

Homeowners & businesses in Lake, Marion, Orange, Osceola, Polk, Seminole, and Sumter counties gain access to fast water leak detection with a guarantee.

The Water Leak Detectors - Central Florida Water Leak Detection Experts

MINNEOLA, FL, UNITED STATES, September 3, 2026 /EINPresswire.com/ -- The Water Leak Detectors, a Central Florida leak detection company, today announced expanded availability of its professional water leak detection services across seven counties: Lake, Marion, Orange, Osceola, Polk, Seminole, and Sumter. The service covers Orlando, Clermont, and the surrounding communities, giving residents and business owners across the region a single local call for locating hidden leaks before they cause costly structural damage.

A hidden leak rarely announces itself. An unexplained jump in a water bill, a warm spot on the floor, a musty smell, or the faint sound of running water when every tap is off are often the only clues. Left undetected, a leak beneath a slab or behind a wall can saturate foundations, warp flooring, and create the damp conditions mold needs. The Water Leak Detectors locates the exact source without tearing into walls, floors, or roofs to go looking for it and find the water leak.

> “Our whole approach is built around precision. We pinpoint the exact spot so any repair is small and targeted, and we stand behind the work: if we can't find your leak, you don't pay.”
>
> *Mark Fisher*

"When water shows up where it shouldn't, most people don't know who to call — and they worry the search will do more damage than the leak," said Mark Fisher of The Water Leak Detectors. "Our whole approach is built around precision. We pinpoint the exact spot so any repair is small

and targeted, and we stand behind the work: if we can't find your leak, you don't pay." Guarantee applies to residential properties with copper pipes.

Professional-grade detection, without the demolition

The company confirms and pinpoints every leak before a wall is ever opened, using a combination of professional equipment on each job:
-Acoustic leak detection equipment that hears pressurized water escaping underground or behind surfaces
-FLIR thermal imaging (infrared) camera that reveals temperature differences invisible to the eye
-Moisture meters that map the affected area
- Video borescope for visual inspection inside walls, cavities, and pipes

The company handles slab, plumbing, wall, roof, window, ceiling, and exterior leak detection for both residential and commercial properties.

Honest, upfront pricing
The Water Leak Detectors offers flat-rate pricing with no inflated callout fees, so customers know the cost before a technician arrives. Residential leak detection is a flat $350. Commercial detection is $450 for the first two hours, then $50 per additional half hour. The company's "we find the leak or it's free" guarantee applies to residential properties with copper pipes.

Local, responsive, and available seven days a week
Serving Central Florida homeowners and businesses, the company is available from 8 a.m. to 10 p.m., seven days a week, and aims to respond quickly — because a running leak only grows more expensive the longer it goes unfound. The company's reputation is reflected in its Google and Better Business Bureau reviews.

Central Florida residents and businesses can schedule a visit by calling (407) 900-4191 or visiting https://www.thewaterleakdetectors.com.

About The Water Leak Detectors
The Water Leak Detectors is a professional water leak detection company serving Central Florida, including Lake, Marion, Orange, Osceola, Polk, Seminole, and Sumter counties. Using non-invasive acoustic, thermal, and moisture-detection technology, the company locates hidden residential and commercial leaks precisely — so repairs stay small, fast, and affordable — and backs its service with a find-it-or-it's-FREE guarantee. Professional, honest, and locally trusted.
