# Kinomap and Les Mills Launch Their New All-in-One Fitness Bundle

*The new subscription combines Kinomap's immersive indoor training experience with LES MILLS+ workouts at a special bundled price.*

Kinomap and Les Mills launch their new fitness bundle

PARIS, FRANCE, September 15, 2026 /EINPresswire.com/ -- The new subscription combines Kinomap's immersive indoor training experience with LES MILLS+ workouts at a special bundled price.

Kinomap, the interactive training app for cycling, running and rowing, and Les Mills, the global leader in group fitness, are launching a subscription bundle that gives users access to both Kinomap and LES MILLS+ through a single subscription.

Designed to deliver a more complete and varied fitness experience, the bundle brings together Kinomap's immersive training routes from around the world and the wide range of workouts available on LES MILLS+. Users can combine interactive cycling, running and rowing sessions with strength, cardio, HIIT, mobility, yoga and other complementary workouts—all from home.

> Together, we can help users introduce greater variety into their routines and stay motivated over time."
> *Philippe Moity, CEO, Kinomap*

This partnership reflects a shared ambition: to make regular physical activity more engaging, accessible and motivating, while giving users greater freedom to build a training routine that matches their goals and preferences.

"We are delighted to launch this new offer with Les Mills and provide our users with an even more complete training experience. Kinomap encourages people to turn every indoor session into an adventure, while LES MILLS+ brings world-renowned workouts that complement endurance training perfectly. Together, we can help users introduce greater variety into their routines and stay motivated over time."

Philippe Moity, CEO, Kinomap

"This launch brings our partnership with Kinomap to life, giving users an exciting new way to build a more complete fitness routine. By bringing together Kinomap's immersive endurance experiences with the breadth of LES MILLS+ workouts, we're making it easier for people to combine cardio, strength, mobility and recovery in a way that works for them. Ultimately, it's about giving people more choice, more variety and more reasons to keep moving."
Marina Nola, Chief Product & Marketing Officer, Les Mills International

Two complementary fitness experiences in one subscription
Kinomap transforms indoor training by allowing users to explore real-world routes from their exercise bike, home trainer, treadmill, elliptical or rowing machine. The platform automatically adjusts resistance or incline on compatible equipment according to the terrain featured in the video, creating an interactive and immersive experience.

LES MILLS+ gives members access to over 2,500 on-demand workouts inspired by the brand's iconic fitness programs. From strength and cardio to mobility and recovery, users can choose from a broad selection of sessions for different fitness levels and goals.
By combining both services, the new bundle enables users to create a more balanced routine that brings together endurance, strength, conditioning and recovery.

Availability and activation
The bundle is now available through the Kinomap website:
- To new users when purchasing a Kinomap subscription.
- As an upgrade for existing Kinomap users whose main subscription was purchased through the Kinomap website.

After subscribing, users will receive an email directly from Les Mills containing their activation code and instructions for accessing LES MILLS+.
The initial launch will apply to web-based subscriptions, with further developments expected as the partnership evolves.
