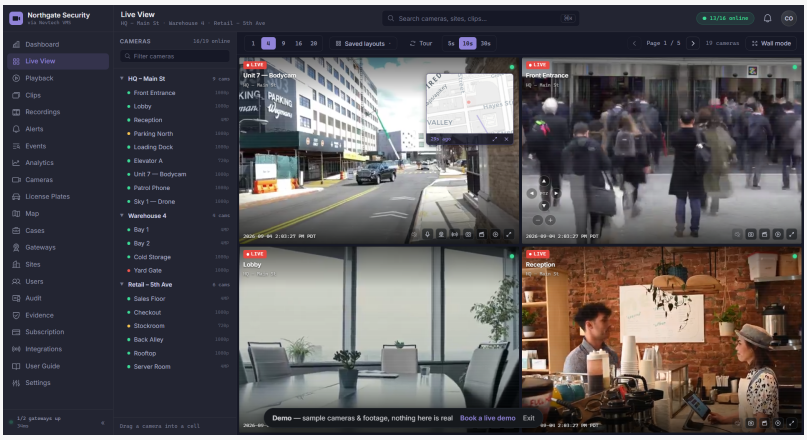
NevTech Launches 'Done-For-You' AI Implementation for Indiana Businesses — Custom AI MVPs Delivered Fast

Indianapolis AI firm brings AI receptionists, AI agents, custom AI MVPs and Generative Engine Optimization (GEO) to Indiana businesses — working software first.



Nevtechvms.com

INDIANAPOLIS, IN, UNITED STATES, September 4, 2026 /EINPresswire.com/ -- NevTech, an Indianapolis-based AI implementation and custom software development company, today announced the statewide expansion of its done-for-you AI services for Indiana businesses. The offering gives small and mid-sized companies a single partner for AI strategy, AI agent development, business process automation and custom minimum viable products (MVPs), built with an AI-native software development lifecycle that delivers production-ready applications in a fraction of the time and cost of traditional development.

> Indiana businesses don't need another presentation about what AI could do for them. They need it running by next month."
>
> *Cody Neville, CEO, NevTech*

Where most AI consulting ends with a roadmap, NevTech starts with working software: an AI receptionist answering the phones, an AI agent qualifying leads and booking appointments, an internal tool that removes a manual process, or a customer-facing micro app that opens a new revenue line.

"Indiana businesses don't need another presentation about what AI could do for them. They need it running by next month," said Cody Neville, CEO of NevTech. "We build AI-native, with AI agents in the loop from the first line of code to the last test. That's how we deliver custom MVPs like never before — a fully working application, integrated with the systems a business already uses, in weeks."

AI implementation built for how Indiana businesses operate

NevTech serves owner-led and mid-market companies across Indianapolis, Carmel, Fishers, Fort Wayne, Evansville, South Bend, Bloomington, Lafayette and the wider state, focused on four sectors where AI automation pays off fast: home services and skilled trades, medical and dental practices, law firms and professional services, and manufacturing and logistics.

AI receptionists and AI voice agents. Inbound and outbound AI phone agents that answer every call 24/7, qualify the caller, book directly into the calendar, send follow-up texts and log every interaction to the CRM. NevTech's AI receptionists are in production at Indiana service businesses today, including a flagship deployment at EverDry Waterproofing, and are priced with a low one-time setup and a simple monthly subscription.

Custom AI MVPs and micro apps. Purpose-built customer portals, quoting tools, scheduling systems, document automation and dashboards, deployed with NevTech's AI-native SDLC and connected to the client's existing software.

Fractional Chief AI Officer (Fractional CAIO). Executive-level AI strategy, vendor selection, governance and implementation oversight, from a Strategy Session to a four-week Implementation Sprint, a standing Fractional AI Officer role, or a complete Done-For-You Build.

Generative Engine Optimization (GEO) and AI-era SEO. Buyers now ask ChatGPT, Gemini, Perplexity and Google AI Overviews which company to call before they search. NevTech's GEO services make a business the answer: citation-ready content, structured data, entity consistency across Google Business Profile and directories, AI-referral tracking and prompt-share monitoring. NevTech runs these programs on its own approval-gated AI marketing platform, so local SEO, GEO, paid search and social operate as one system with human sign-off on every change.

From AI readiness to measurable ROI

NevTech Catalyst provides an AI Readiness Assessment across eight dimensions, an auto-generated 30/60/90-day roadmap and an ROI dashboard, paired with OS Workbench, a private team AI workspace with document AI and secure search over company files. The same engineering team builds NevTech VMS, a cloud AI video surveillance platform serving businesses, municipalities and law enforcement.

Availability

Services are available now throughout Indiana. Request a free AI readiness conversation at nevtech.io or (317) 508-9493 — where the phone is answered by NevTech's own AI receptionist.

About NevTech

NevTech is an Indianapolis, Indiana AI implementation, AI agent development and custom

software company helping small and mid-sized businesses adopt artificial intelligence with working software as the first deliverable: AI receptionists and voice agents, AI workflow automation, custom MVPs and micro apps, Fractional Chief AI Officer services, and Generative Engine Optimization (GEO) and SEO for the age of AI search. NevTech is a portfolio company of Nevturn Ventures. Learn more at nevtech.io and nevtechai.com.
