

# Share digital files with friends and family using the new LaCie CloudBox

/EINPresswire.com/ UK (submitpressrelease123.com - press release) People looking for a way to share digital files and make music, photos and films more accessible may find the new LaCie CloudBox available at Dabs.com is the perfect choice for them.

When families have multiple electronic devices in their home, such as a computer, laptops and tablets, it can be frustrating when files are all stored on different machines. However, this no longer has to be a problem with the [LaCie NAS CloudBox](#), which is currently available from Dabs from the introductory price of just £99.99.

The LaCie CloudBox enables people to keep all of the files spread across home computers in one place. Files can be stored in the Family folder for shared access, while Private folders can also be created for limited access to personal files. What is more, digital files can even be shared with friends outside of the home by sending them using secure download links or by sharing via the cloud.

The device is simple to set up as it has just one plug. Once installed, family members will be able to move files from the different computers in their home to their LaCie CloudBox. Digital film libraries stored on a network-connected TV can also be shared with the LaCie CloudBox. When people are away from home, they can access their music, films, photos and other documents while on the go using a web-connected smartphone, tablet, laptop, Mac or PC.

Duncan Rutherford; Product Manager at dabs.com, said: "The LaCie CloudBox will become an essential piece of equipment for families who want an easy way to share their media and documents. Photos stored on a computer in the study can be accessed by someone using a tablet in the living room, while films stored on a TV can be watched by a family member upstairs on their laptop.

"Dabs is pleased to be able to offer the [LaCie 1TB CloudBox](#) for the introductory price of just £99.99 and with Christmas just around the corner, this could be the perfect gift for the whole family."

The LaCie CloudBox can be purchased online from Dabs.com and comes with an Ethernet cable, quick install guide, power supply and the necessary software suite. The 2TB and 3TB models have just been released too so if you need extra storage; now is the time to buy!

With [external hard drives from Dabs.com](#) also available, there's no reason for your files to not be backed up.
