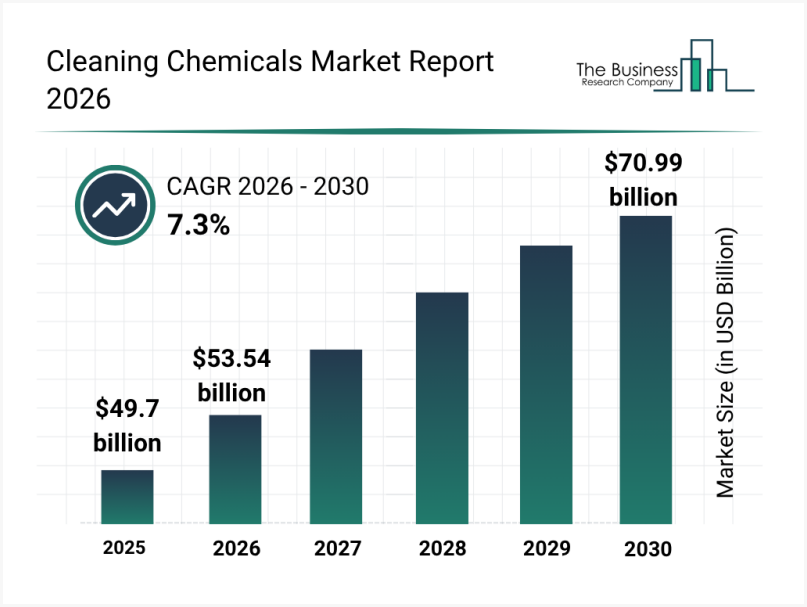
Cleaning Chemicals Market Value Expected To Grow At 7.3% CAGR, Reaching $70.99 Billion By 2030

The Business Research Company's Cleaning Chemicals Global Market Report 2026 – Market Size, Trends, And Forecast 2026-2035

LONDON, GREATER LONDON, UNITED KINGDOM, September 7, 2026 /EINPresswire.com/ -- The cleaning chemicals sector has witnessed remarkable growth over recent years, driven by heightened attention to cleanliness and hygiene across various settings. As awareness of sanitation rises and industries adopt stricter standards, this market is set to experience continued expansion. Let's explore the current market size, growth drivers, regional outlook, and emerging trends shaping the future of cleaning chemicals.

The Business Research Company



Cleaning Chemicals market Size

Cleaning Chemicals Market Size and Growth Expectations Through 2026

The cleaning chemicals market has shown strong development, with its value rising from $49.7 billion in 2025 to a projected $53.54 billion in 2026. This represents a compound annual growth rate (CAGR) of 7.7%. Growth during the past period was largely fueled by increasing hygiene and sanitation awareness in urban environments, wider use of chemical cleaners in homes and institutions, growth in healthcare facilities needing disinfectants, higher cleanliness standards in industrial manufacturing, and rising issues related to water and surface contamination.

Looking ahead, the market is expected to maintain robust growth, attaining $70.99 billion by 2030 at a CAGR of 7.3%. This forecast is supported by growing demand for sustainable and green cleaning options, stricter healthcare and food safety regulations, more widespread use of automated cleaning technologies across industries, innovation in bio-based chemicals, and heightened emphasis on infection prevention and control worldwide. Key trends expected to influence the market include rising popularity of eco-friendly and biodegradable products, increased use of concentrated and low-dose cleaning formulations, expansion of antimicrobial and hospital-grade disinfectants, development of specialty chemicals for industrial hygiene, and growing adoption of enzyme- and bio-based agents.

Understanding Cleaning Chemicals and Their Purpose
Cleaning chemicals refer to substances or chemical blends formulated to remove dirt, grease, stains, bacteria, and other pollutants from surfaces and environments. These products play a critical role in maintaining cleanliness, hygiene, and sanitation by breaking down or eliminating various contaminants efficiently. The chemical composition is tailored to achieve different levels of cleaning power and disinfection, depending on the intended application and environment.

Key Factors Spurring Demand in the Cleaning Chemicals Market
A rising focus on personal safety and hygiene is a major factor propelling market growth. Maintaining cleanliness and adopting safe habits are essential for protecting health, preventing infections, and promoting overall well-being. Heightened awareness of infectious diseases encourages individuals and organizations to embrace improved cleaning and preventive measures, driving demand for effective cleaning chemicals. These substances help reduce germs, bacteria, and contaminants on surfaces, lowering infection risks and supporting healthier environments.

For example, in August 2025, UNICEF reported that in 2024, 1.7 billion people worldwide still lacked basic hygiene services, including 611 million without access to handwashing facilities. Meanwhile, four countries had already achieved near-universal access to basic hygiene services (above 99%), and nine others were on track to do so by 2030. This data highlights the ongoing global prioritization of hygiene improvements, which in turn is stimulating growth in the cleaning chemicals market.

Which Geographic Regions Are Leading the Cleaning Chemicals Market by 2026
In 2025, North America stood as the largest regional market for cleaning chemicals. However, Asia-Pacific is anticipated to register the fastest growth during the forecast period. The market

analysis spans a diverse set of regions, including Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a comprehensive view of global market dynamics.

Our 2026 market reports now include enhanced strategic insights through:
• Market attractiveness scoring and analysis
• Total addressable market (TAM) analysis
• Company scoring matrix graphics and tables
• Excel-based forecasting dashboards
• Market hotspots infographics
• Key technologies and future trend analysis
• Updated graphics and tables
