

Red Vipers Offers Dieters a New Blend of Powerful Support

/EINPresswire.com/ [Red Vipers with ephedra](#) by Beta Labs is designed to offer support to those who are seeking to lose weight in the coming year.

According to Shape Magazine, one of the main reasons why people can't stick to their New Year's resolutions is that they try to accomplish their goals without support. Red Vipers with [ephedra](#) by Beta Labs is designed to offer support to those who are seeking to lose weight in the coming year.

With a powerful blend of ingredients, Red Vipers ephedra diet pills help dieters who have struggled with controlling their appetite and burning fat instead of muscle. In typical restrictive diets, dieters often end up eating less and exercising more, but the weight lost is muscle and not fat.

When a person loses muscle, this will decrease their metabolism, making it harder to keep weight off, even after they have reached their weight loss goal.

[Red Vipers diet pills](#) include a proprietary and powerful blend of ingredients, including 1,3,7-trimethylxanthine, Phenylethylamine HCL, Methylhexamine, Raspberry Ketones, Ephedra Extract, Theobromine, Sulbutiamine, Vinpocetine, and Yohimbe Extract.

This blend of ingredients can help support a dieter in making long-term lifestyle changes. By controlling the appetite and boosting energy, Red Vipers by Beta Labs helps support a dieter in making new habits that will last them a lifetime.

Weight loss isn't a short-term process, and reaching the target weight is only half the battle. With Red Vipers, those who are seeking to slim their body for years to come can have some support along the way, increasing their chances of crossing a New Year's resolution off their list.

Another new product for 2013 is Rhino Rush. Rhino Rush is an energy shot with ephedra. It is extremely powerful and puts a whole new meaning to an energy shot.

Red Vipers by Beta Labs is now available in certain health stores and via online at [EphedraWarehouse.com](#).
