# DSW Named Among India's Top 20 AI Innovators Under NPCI's TokenNXT; Shortlisted for Global Fintech Awards 2026

*DSW to showcase UnifyAI OS and its AI-native enterprise vision at GFF 2026, while being recognised among five finalists for Best InsuranceTech Solution*

Data Science Wizards at Global Fintech Fest 2026

DUBAI, DUBAI, UNITED ARAB EMIRATES, September 8, 2026 /EINPresswire.com/ -- Data Science Wizards (DSW), the creator of UnifyAI OS, an Enterprise AI Operating System designed to help organisations run, govern and scale AI as a continuous operational system rather than fragmented tools, will showcase its enterprise AI capabilities at Global Fintech Fest (GFF) 2026, taking place from September 9–11 at Jio Convention Centre, Mumbai.

DSW will offer a live demonstration of UnifyAI OS at Booth JA14, Jasmine Hall, from September 9–11, showcasing how enterprises can operationalise and scale AI and Agentic AI with runtime governance, control and enterprise ownership built in.

The GFF participation comes alongside two significant recognitions for DSW. The company has been recognised among India's Top 20 AI Innovators under TokenNXT by the National Payments Corporation of India (NPCI) at the Bharat AI Zone. Separately, DSW has been shortlisted among five companies for "Excellence in FinTech – Best InsuranceTech Solution" at the Global Fintech Awards 2026.

## Showcasing Enterprise AI at GFF 2026

GFF 2026 brings together leaders and innovators across banking, financial services, fintech and emerging technologies under the theme “Potential to Impact: Agentic AI | Tokenisation | Quantum.”

At the event, DSW will demonstrate how UnifyAI OS enables enterprises to build, deploy, orchestrate, govern, monitor and continuously operate AI systems across their business environments.

The showcase will highlight DSW’s approach to helping enterprises move beyond fragmented AI initiatives and isolated pilots towards connected, governed and scalable AI operations, as organisations increasingly explore Agentic AI and AI-driven workflows.

Sandeep Khuperkar, Founder & CEO, Data Science Wizards, said:

“Enterprise AI is moving beyond adding AI features to existing applications. The next phase is about building enterprises where AI is embedded into the way systems, workflows and decisions operate. An AI-native approach requires more than intelligent models. It requires the right operating foundation, governance and control to make AI work reliably at enterprise scale. At GFF, we look forward to demonstrating how UnifyAI OS supports this shift and what an AI-native enterprise can look like in practice.”

## Among India’s Top 20 AI Innovators Under TokenNXT

DSW has been selected under TokenNXT by NPCI, a dedicated initiative within the Bharat AI Zone at GFF 2026 focused on identifying and showcasing AI innovations through live demonstrations.

As one of India’s Top 20 AI Innovators selected under the initiative, DSW will showcase UnifyAI OS across sectors including banking, insurance, healthcare and more.

The selection provides DSW an opportunity to demonstrate its enterprise AI capabilities to financial services leaders, potential clients, partners and investors.

## DSW’s AI-Native Enterprise Vision

As enterprises move from AI experimentation towards broader adoption, the focus is increasingly shifting from individual models and applications towards the systems, workflows and operating environments required to run AI at scale.

As part of GFF 2026, Sandeep Khuperkar, Founder & CEO, Data Science Wizards, will speak on “From AI-Featured to AI-Native – Looking at Enterprise AI Through a Systems Lens” on September 11 from 9:45–9:55 AM at Hall 203.

The session will explore the evolution from adding AI capabilities to existing enterprise environments towards a more integrated, systems-led approach to enterprise AI.

Shortlisted for Global Fintech Awards 2026
Further strengthening its presence within the fintech ecosystem, Data Science Wizards has been shortlisted for “Excellence in FinTech – Best InsuranceTech Solution” at the Global Fintech Awards 2026.

DSW is among five companies shortlisted in the category, recognising organisations contributing to innovation in InsuranceTech and financial technology.

The recognition adds an InsuranceTech dimension to DSW’s GFF presence as insurers and financial institutions increasingly explore AI-led transformation across business processes and operational environments.

Pritesh Tiwari, Founder & Chief Data Scientist, Data Science Wizards, said:

“AI adoption is moving into a stage where enterprises need to think beyond individual models and applications. The real challenge is creating the systems, controls and operating environments that allow AI to function reliably at enterprise scale. Our presence at GFF reflects our focus on that transition — helping enterprises build AI capabilities that are operational, governed and scalable.”

About Data Science Wizards
Data Science Wizards (DSW), the creator of UnifyAI OS, an Enterprise AI Operating System designed to help organisations run, govern and scale AI as a continuous operational system rather than fragmented tools, helps enterprises build, deploy, govern, operate and scale AI across their business environments.

UnifyAI OS provides an enterprise AI operating foundation connecting AI capabilities with business workflows and enterprise environments, helping organisations move from AI experimentation towards production and scalable adoption.
