FabTrol Systems, a U.S.-based global provider of steel fabrication management solutions, will exhibit at SteelFAB 2013 in Sharjah, UAE, at the Sharjah Expo Center January 14 – 17.

SteelFAB, the largest annual trade show in the region for the metal working, metal manufacturing and steel fabrication industries, provides regional and global participants in the steel sector supply chain with an opportunity to learn about relevant providers and see software, machinery and hardware in action, as well as participate in roundtable discussions and technical and certification trainings. From its inception in 2004, SteelFAB has grown each year, this year featuring over 200 exhibitors representing companies from around the globe.

SteelFAB 2013 attendees are encouraged to visit FabTrol Systems during the event (Exhibit 143, Hall 2) to see first-hand how the company's steel fabrication management solutions help fabricators meet project schedules while maximizing efficiency and profits. FabTrol Systems will feature its full suite of diverse steel fabrication management solutions, including [FabTrol Pro](#) and FabTrol MRP, the company's fabrication management solutions, and FabTrol Rev, a dedicated drawing/document control solution designed specifically to meet the needs of the steel fabrication sector. During the event, SteelFab 2013 participants will also have an opportunity to meet Mark W. Colk of Steelex International, FabTrol Systems' Middle East regional distributor.

SteelFAB attendees are also encouraged to attend FabTrol Systems' seminar, Value Chain Integration for Steel Fabrication, at 4:00 p.m., on January 15 to learn more about the benefits of using an integrated steel fabrication management solution to manage projects. Using FabTrol software as an example, Jim Moody, FabTrol Systems' International Business Development Manager, will discuss the characteristics and benefits of modular integrated solutions for managing projects from estimating through to job-site delivery. Mr. Moody will also discuss the importance and benefits of integration between fabrication management software and supply chain hardware and software, such as modeling and bar coding software and CNC controllers.

To learn more about FabTrol Systems' steel fabrication management solutions visit [www.fabtrol.com](http://www.fabtrol.com) or email [info@fabtrol.com](mailto:info@fabtrol.com).

## About FabTrol Systems

FabTrol Systems, a global leader in steel fabrication management solutions since 1984, is a proud member of the Dowco Group. Founded by steel fabricators, and still built around a core team of former steel fabricators, the company continues its commitment to the industry by continuously researching fabricators' needs, developing new software solutions, actively seeking feedback from its customer companies—over 1,000 globally—and by working with other industry leaders to address existing and future needs.
