Krown Technologies Announces KROWN Watch, the First Dedicated Web3 Watch Bringing Digital Ownership and AI to the Wrist

Planned integration of Qastle Wallet, Excalibur and QORYN combines digital asset management, personal AI and everyday utility in one wearable.

Krown Watch

Krown Watch Collection

MONROE, LA, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- Krown Technologies Inc. today announced KROWN Watch, a dedicated Web3 watch being developed to bring digital asset ownership, payments, artificial intelligence and everyday wellness tools directly to the wrist.

KROWN Watch places Web3 at the center of the wearable experience. Its planned capabilities connect the convenience of Qastle Wallet, the cold-wallet functionality of Excalibur and the intelligence of QORYN with familiar watch features, giving users a practical way to engage with their digital lives throughout the day.

The ambition is straightforward: make using Web3 as natural as checking the time.

Digital Ownership, Built Into Everyday Life

KROWN Watch is being designed around moments that matter: checking a wallet balance before a purchase, reviewing a payment, asking an AI assistant about the day ahead, or checking heart

rate and starting a timer before a run.

The planned feature set includes:

- Qastle Wallet: Access to everyday digital asset management, including balance checks and the ability to review, send and receive supported assets through a watch interface.
- Excalibur: Integrated cold-wallet capabilities intended to bring protected key storage and deliberate transaction authorization into the KROWN Watch experience.
-QORYN AI: Conversational assistance for questions, calendar information and everyday tasks, designed for quick interactions on the wrist.
-BloqTalk and BloqSocial: Planned access to Krown's secure messaging and Web3 social experiences, extending the watch's role beyond financial activity.
-Health, fitness and daily essentials: Heart-rate monitoring, activity tools, run timers, time, date and calculator functions.

Security-focused development: A roadmap incorporating biometric authentication and post-quantum cryptography, with implementation details to be established through engineering and validation.

Together, these capabilities define Krown's vision for a wearable that connects personal convenience with greater control over digital assets and interactions.

Statement From James Stephens, CEO of Krown Technologies

Krown Watch Craftsmanship

Krown Watch Exploded View

Krown Watch Qastle Payment

“Digital ownership should be something people can use confidently throughout their day,” said James Stephens, CEO of Krown Technologies. “With KROWN Watch, we are bringing our vision for Web3 into a device people can wear, understand and make part of their lives. Checking your assets, reviewing a payment or asking QORYN a question should feel clear and purposeful.”

“Our ambition is substantial, and so is our responsibility to get the experience right,” Stephens continued. “We are bringing together wallet technology, AI and everyday utility with security as a core design priority. KROWN Watch represents our commitment to making digital ownership more accessible, more personal and more useful.”

A Watch for the Way People Live

The planned unisex collection features stainless steel, black and pink finishes, complemented by matching metal bracelets and interchangeable leather, textile and silicone bands. The design supports a range of settings—from a morning run to a business meeting—with a consistent KROWN identity.

KROWN Watch expands Krown Technologies’ product vision into wearable hardware, creating a new way to connect with its financial, AI and communications ecosystem.

Pricing, release timing, supported assets and networks, and final hardware specifications will be announced separately as development progresses.

KROWN Watch. What’s in YOUR BAG?

About Krown Technologies

Krown Technologies Inc. develops blockchain and digital technologies focused on digital ownership, financial utility and security. Its ecosystem brings together products and services intended to make participation in the digital economy more accessible and useful.
