Golds Sewer Line Indy Nears One-Year Mark With Specialized Sewer-Line Focus

Indianapolis-area company focuses exclusively on sewer-line inspections, repairs and replacements while helping homeowners better understand their options.

INDIANAPOLIS, IN, UNITED STATES, September 8, 2026 /EINPresswire.com/ -- As Golds Sewer Line Indy approaches its first year in business, the locally owned company is continuing to build around the idea that led to its creation: bringing a more specialized approach to residential sewer-line work.

> “Our job is to show them what we’re seeing, explain what it means and walk them through the different ways we can solve it.”
>
> *Kyle Roy, Golds Sewer Line Indy*

Owners Kyle Roy, Anthony Miller and Tom Gastino came into the business with years of experience in excavation, construction and heavy equipment through Silvers Concrete and Paving, a separate concrete and paving company in Indianapolis they continue to operate.

That background gave the team experience with many of the operational demands involved in underground sewer work. It also led them to recognize an opportunity to create a company focused specifically on sewer lines rather than general plumbing.

Today, Golds Sewer Line Indy performs sewer-camera inspections, repairs, full sewer-line replacements and related underground work throughout Indianapolis and surrounding communities.

An important part of the company's approach happens before excavation begins.

Golds uses high-definition camera equipment to inspect sewer lines and identify issues within the pipe. The team then reviews the findings with the homeowner, explains the condition of the line and discusses the available options before recommending a course of action.

“A lot of homeowners dealing with a sewer problem don’t really know what they’re looking at or what their options are,” Roy said. “Our job is to show them what we’re seeing, explain what it means and walk them through the different ways we can solve it. We want them to understand why we’re recommending something before they spend the money to fix it.”

That focus has helped shape Golds during its first year.

Sewer-line problems can range from localized damage that may be repairable to widespread deterioration requiring replacement. By concentrating specifically on sewer work, the company aims to evaluate each property individually rather than beginning with a predetermined solution.

The company's excavation background also allows its crews to handle the physical work involved in sewer-line projects, including digging, working around existing utilities and minimizing disruption to surrounding property.

Customer feedback during the company's first year has frequently highlighted communication, responsiveness, knowledge and fair pricing. Reviews also mention the team's willingness to explain the work and walk homeowners through projects before and during construction.

For Golds, approaching the one-year mark is less about changing direction than continuing to develop the specialty the company was created around.

The goal remains straightforward: understand the sewer problem, explain the available options clearly and perform the work with the knowledge and equipment required to do it properly.

About Golds Sewer Line Indy

Golds Sewer Line Indy is a locally owned sewer-line contractor serving Indianapolis and surrounding Central Indiana communities. The company specializes in sewer-camera inspections, sewer-line repairs, sewer-line replacements and related underground work.
