

IT Service Managers shown how to manage information security with an ISO27002 Foundation course

/EINPresswire.com/ Service providers, like any other organisation, have to pay close attention to the integrity, availability and confidentiality of information. Managing the security of information is a process which requires the commitment, skills and knowledge of more than one member of the team who have different responsibilities. Sometimes IT Service Managers can fall short of understanding the company's information and data relationships, risk management approach and security controls. They can find the answer to these, and other, questions by attending the EXIN accredited Information Security Foundation based on [ISO/IEC 27002 training course](#), which is delivered in London by information security experts [IT Governance](#). More information is available from www.itgovernance.co.uk/shop/p-603-information-security-foundation-based-on-isoiec-27002.aspx.

Alan Calder, CEO of IT Governance, says, "IT Service Managers often face information security challenges and they need to gain more understanding in initiating, planning and managing an information security programme. Having foundation knowledge of the ISO27002 Standard is essential to achieve the goals of an ITIL® Service Management programme."

"Our Information Security Foundation based on ISO/IEC 27002 training course carefully explains the security management process and its relationship with ITIL processes, in particular, Service Level Management, Incident Management and Change Management." adds Calder.

The Information Security Foundation based on ISO/IEC 27002 training course is also well suited for Data Protection Officers, HR Managers and Head of Departments who are responsible for any aspects of information security management.

This course is based on the EXIN Information Security Foundation syllabus and prepares delegates for the EXIN ISFS examination which is taken at the end of the day. Successful candidates will be awarded the EXIN Information Security Foundation Certificate.

To book onto the next Information Security Foundation based on ISO/IEC 27002 training course go to www.itgovernance.co.uk/shop/p-603-information-security-foundation-based-on-isoiec-27002.aspx or call the IT Governance customer service team on +44 (0) 845 070 1750.
