

Intradyn Launches New Archive Operating System for Appliances

/EINPresswire.com/ Virtual appliance and remote backup technology for [email archiving](#) provides enhanced monitoring and search features with unlimited processing and storage capabilities.

MENDOTA HEIGHTS, Minnesota – Intradyn, an email archiving and eDiscovery expert, has announced that its Archive Operating System (AOS) 5.2 upgrade is now available. The product offers distributed searching capabilities, one-click contact viewing and enhanced monitoring and reporting.

The new operating system allows another [RazorSafe Appliance](#) to be added on for more archiving and backup storage space without having to replace the first unit or migrate its data. The user is notified when the RazorSafe Appliance for email archiving is running low on space and prevents it from overloading.

"AOS 5.2 works with our RazorSafe Appliance to infinitely expand the storage and processing capabilities," said Adnan Olia, chief operating officer of Intradyn. "Our new federated search feature lets the user seamlessly search for data across multiple units. Our storage expansion is augmented by equivalent processing power to satisfy the need for complex eDiscovery requests."

Another feature is a one-view contact so that users can see all of their archived Outlook email contacts, regardless of when or where they are saved in the company's archiving system. The new AOS 5.2 provides added stability and resilience to the data storage system over version 5.1. It is also available for the Intradyn flagship product Orca Virtual appliance using VMware.

About Intradyn: Founded in 2001, Intradyn (<http://www.intradyn.com/>) is a next-generation disk-based and virtual network backup, email archiving and eDiscovery appliance provider. The Minnesota-based company offers email storage and [data backup strategies](#) to small and large businesses through the Orca Virtual Appliance and the RazorSafe Appliance. Intradyn licenses its technology to private label companies in various markets and is used worldwide in the Americas, Middle East, Europe and Asia Pacific Rim.
