

The Razer DeathAdder 2013 Gaming Mouse...

/EINPresswire.com/ USA (Submitpressrelease123.com - press release) The brand new [Razer DeathAdder 2013](#) is the world's first [gaming mouse](#) to be adapted with a 6400dpi optical sensor, giving its user more power, better performance and more control.

The gaming mouse's 4G sensor has been optimized to work in perfect conjunction with all Razer mouse mats, so users don't have to worry. Choose from one of the pre-set Razer mouse mats to calibrate the sensor, or opt for manual mode if using a custom mat.

Razer has scaled down the sensitivity of their gaming mouse to catch up with physical hand movement across the surface so gamers can experience an almost 1-to-1 response between the mouse and game. With no drift control, it's really easy to make minor movements; fantastic for gamers who often require the utmost precision in order to win the game. What's more, the Razer DeathAdder 2013 has been ergonomically improved, with the addition of rubber side grips, allowing gamers to keep their fingers firmly in control, no matter how fast they're moving the mouse across the mat.

Describing the Razer DeathAdder 2013 as "the pinnacle of gaming accuracy", Sam Binks, Product Manager said: "we've adapted and improved on the previous gaming mouse to create an all-new and improved gaming experience. We can safely say that the Razer DeathAdder 2013 is the perfect mouse, developed for gamers by gamers."

Left-handed gamers need not worry; Razer also has a left-handed version of the DeathAdder gaming mouse, shaped perfectly for those who predominantly use their left-hand when gaming. The left-handed version is essential to equip the user with the utmost precision and comfort when gaming.

Gamers the world over will profit from the ultimate gaming experience; for more power, better performance, and more control, choose the Razer DeathAdder 2013.

The brand new Razer DeathAdder 2013 will be available to buy from 8th January 2013. For more information about Razer products, visit the website at www.razerzone.com.
