Mr. Mohit Shrivastava, Coherent Market Insights, will present a session titled "Fire Industry Ecosystem Analysis & Industry Landscape," covering emerging trends, technology adoption, and the outlook for fire and safety solutions across India.

"When we analyze the fire and safety industry in India, one clear shift is in the demand pattern, from reactive compliance to proactive risk management. A few years ago, most enquiries we tracked were driven by regulatory deadlines. Today, a growing share of activity comes from organizations building fire safety into infrastructure planning from day one — before any regulation requires it. That shift in intent, from compliance to prevention, is one of the clearest signals of how this industry is maturing," said Mr. Mohit Shrivastava, Coherent Market Insights.
