

Key Metric Software Announces Free SQL Server Backup Software

/EINPresswire.com/ Free SQL Server backup software for Windows makes off-site database backups fast and easy

Key Metric Software has announced the release of SQL Backup Master, a [free Windows database backup](#) software product that allows SQL Server databases to be backed up to Amazon S3, Dropbox, Google Drive, an FTP server, or a local/network drive.

SQL Backup Master makes it easy to send compressed (and optionally encrypted) SQL Server [database backups to the cloud](#). Built-in scheduling allows you to automatically upload database backups to any number of the supported cloud storage services on a recurring basis.

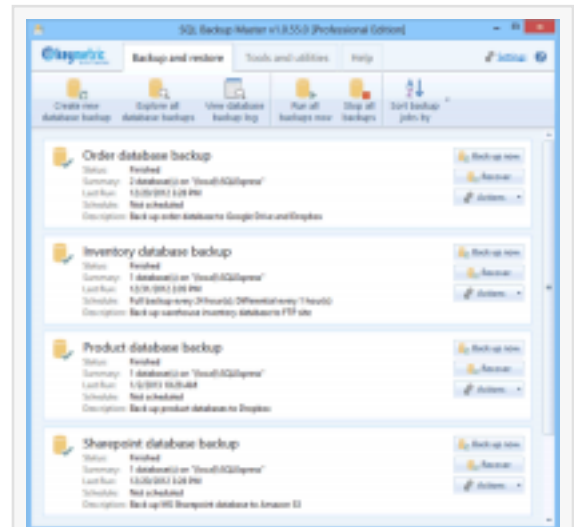

SQL Backup Master supports full, differential, and transactional log backups. It can also encrypt compressed database backup files using AES-256. Email notification support is also included, allowing you to be notified in the event of a backup failure (or success). An integrated log viewer provides an easy means of reviewing each step involved in the backup process.

[Database backup recovery](#) is also fully integrated into SQL Backup Master, making it easy to restore databases to SQL Server in the event of failure.

SQL Backup Master runs on Windows XP, Vista, 7, 8, Server 2003, Server 2008, and Server 2012. The basic edition of SQL Backup Master is completely free, with advanced features available in the Standard, Professional, and Site editions of the product.

About Key Metric Software

Key Metric Software is a leading provider of IT software products, including our award-winning FolderSizes disk space analysis tool. At Key Metric Software, our commitment to quality software is driven by an even stronger commitment to customer service and satisfaction.
