

Celebrating Three Years of FORZA T5 Super Heat

/EINPresswire.com/ When capsaicin was hailed for its extraordinary weight loss properties in 2010, FORZA acted fast to introduce the red hot chilli extract to its [T5 Super Strength](#) formula to create [T5 Super Heat](#).

Capsaicin is a compound that is present in different types of peppers, such as jalapeño, habanero and cayenne, and is responsible for the burning intensity that results from ingesting them. In its pure form, capsaicin has a Scoville rating of 16 million and is the primary ingredient in the irritant weapon pepper spray often used by the police in riot control situations.

Although scientists have been confident of the weight loss potential of capsaicin for decades, until recently there was no way for somebody to consume a highly-concentrated amount without having to suffer the mind-blowing heat and gastric aggravation. With modern technology, however, it became possible for food supplement manufacturers like FORZA to use protective coatings when producing otherwise unbearably hot chilli pepper tablets and capsules to ensure that they can be taken regularly with the greatest of ease.

If you can't stand the heat, get out of the kitchen.

“One of the main reasons that we use capsaicin as an active ingredient in our [fat burners](#) is for its ability to induce thermogenic activity, which speeds up the resting metabolism and increases overall caloric expenditure. Although this process will almost certainly lead to slow and steady weight loss regardless of any significant change in lifestyle, combining these effects with regular exercise and a sensible diet plan transforms the body into one big fat-burning machine.”

Lab Technician – FORZA Technology Centre

T5 Super Heat remains one of FORZA's most popular diet pills and, after building a solid reputation among UK dieters as a proven fat incinerator, this success looks set to continue.

FORZA Supplements has been an established sports nutrition and diet capsule manufacturer, wholesaler and retailer since 2007, holding over 15 trademarks and distributing worldwide from its Kent-based technology centre. Full site: www.forzasupplements.co.uk
