

# Tomato Ring and the Veggie Cage Introduced by Veggie Cage LLC

---

/EINPresswire.com/ Master Gardeners have been heaping praise on Veggie Cage LLC for their newest home gardening products, the [Tomato Ring](#) and the Veggie Cage, the Cage On A Stake

Veggie Cage LLC., said today that they have designed and released to the market two ground-breaking, home gardening products; the Tomato Ring and the Veggie Cage - the Cage on a Stake. In just a few short weeks, both the Tomato Ring and the Veggie Cage have received critical acclaim from home gardeners as well as professional master gardeners for the ingenious design and remarkable functionality of these home gardening products.

One of the biggest issues for gardeners has always been the need to properly secure tomato plants and other similarly growing vegetable plants. They have been voicing their complaints for many years about bulky tomato cages that don't do the job and also require a great deal of storage space in the winter. Methods such as of securing vegetables by tying them were also found to be less than ideal by the home and professional gardening community because they look messy, require too much labor and more often than not, result in broken vines.

The Tomato Ring and the Cage on a Stake from Veggie Cage LLC now give gardeners a practical and affordable alternative to raising their vegetables while also helping to transform the art of gardening. Among the most compelling features of both devices are their "toss in a bucket storage" as well as their proven function and a unique look, which enhances the eye appeal of every garden where they are used. This is an especially welcome upshot of using the Tomato Ring and the Cage on a Stake, an opinion which is also echoed by the neighbors and friends of the home and master gardeners now using these inventive new products.

The versatility and ingenuity of the Veggie Cage and the Tomato Ring is not lost on its customer base. "I just wanted to let you know I really enjoy the Veggie Cages. I use them also to support my bush beans, and soon, pole peas. They work great for more than just tomatoes," said one master gardener expressing his obvious endorsement of the new Veggie Cage products. Another master gardener responding to questions about her findings when using the Tomato Ring and Cage on a Stake replied, "These are not just a great tomato cages. They are also amazing for growing snow peas too. Now it is really easy to see the snow peas so I don't miss any."

"I need more! They look good and do a wonderful job. No more ugly wire tomato cages," writes one customer while another says, "The things are great for storing in my garage. I just threw

them in a plastic bucket at the end of the season. What a terrific idea."

The Tomato Cage and Cage on a Stake are also great devices for anyone interested in taking up gardening as a new hobby because they provide an affordable option in this challenging economy. The easy storage options and aesthetically pleasing presentation are other great benefits enjoyed by the gardening hobbyist when using these inventive new products.

"Finally, I found something that holds up my tomato plants without falling over," said one happy Tomato Ring owner while another contacted for their feedback commented, "I hate tying up tomato plants. Last year I used the Tomato Ring and Cage on a Stake and I never had to tie them at all. I loved it."

For more information on Veggie Cage LLC or the Tomato Ring and the Veggie Cage, or to schedule an interview with the owners please call 314-276-4140 or email to [rob.sanazaro@veggiecage.com](mailto:rob.sanazaro@veggiecage.com)

#### About Veggie Cage LLC

The Veggie Cage company, located in St. Louis, Missouri, was founded on the belief that anything is possible. Company owners Rob Sanazaro and Michel Paille note, "Even as many other people offer opinions that products made today are too expensive to produce in America, we hold firm to the concept of 'Made In The USA.'"
