

New LED Candles From Smart Candle Provide Easy, Effortless Wedding Décor Ideas

/EINPresswire.com/ Perfect for indoor or outdoor settings, flameless candles from Smart Candle glow with the soft light of the real thing. Wedding décor is brighter and more realistic with the breathtaking ambiance these high-quality candles provide.

[LED candles](#) are becoming a popular choice for wedding planners and brides, offering the flickering glow of candlelight without the added worry. Smart Candle, the global leader of flameless candles and LED lighting products, offers battery-powered LED candles that are hard to differentiate from the real thing. These hand-molded candles with a wax finish look and feel like traditional candles, but are able to go places other candles can't.

Basic LED candles have come a long way since their inception. Smart Candle offers TruFlame™ technology, representing years of research and development. With the perfect balance of color and light, these candles use an efficient LED light that simulates the flicker of a candle flame using an LED light. Smart Candle takes this technology one step further by using enhanced LED technology to force light to the outside of the candle, which creates a more realistic glow. With multiple timer settings, these candles make it easy for customers to control their ambiance with ease.

For brides that have been limited in their wedding décor choices due to budget restrictions, Smart Candle's battery operated LED candles are a great option. Many wedding venues have restrictions on open flames and candles are banned from ceremonies and reception halls. Some brides choose to avoid open flames because of wedding dress fabrics or décor fabrics that would be sensitive to damage if they caught on fire.

Outdoor wedding spaces are also a problematic setting for traditional candles. Strong winds can easily extinguish a candle's flame. The longevity of a traditional candle also pales in comparison to the hours of bright flame that an LED candle provides.

About Smart Candle:

For the past 10 years, Smart Candle has been globally recognized as the market leading brand in flameless candles and LED lighting products. Smart Candle is proud to provide high-quality LED products to commercial and retail customers in more than 50 countries.
