Synechron appointed approved supplier on UK Government's G-Cloud 15 framework

Public sector organisations gain streamlined access to Synechron's cloud software, digital transformation, AI governance, and cloud support capabilities.

LONDON, UNITED KINGDOM, September 10, 2026 /EINPresswire.com/ -- Synechron, a leading digital transformation consulting firm, today announced that it has been awarded a place as an approved supplier on the Government Commercial Agency's (GCA) G-Cloud 15 framework, the latest iteration of the UK Government's cloud services procurement programme.

> "Our extensive experience architecting and securing critical systems across heavily regulated markets aligns seamlessly with the stringent demands of public sector digital transformation."
>
> *Krinesh Amin, Managing Director of Synechron UK*

Through G-Cloud 15, Synechron offers services across two key categories:

Cloud Software Services: ServiceNow design, implementation, and advisory services covering IT operations, service management, asset management, cloud support, employee experience, application development, and data governance.

Cloud Support Services: security, risk and compliance, AI implementation, and agile delivery, helping public sector organisations strengthen governance, manage operational risk, adopt AI responsibly, and accelerate cloud transformation initiatives.

As public sector organisations face growing pressure to modernise legacy systems while navigating rising cybersecurity threats, evolving regulatory requirements, and the rapid adoption of artificial intelligence, Synechron's appointment to G-Cloud 15 provides a simplified route to procure proven cloud, digital transformation, ServiceNow, and AI governance expertise. Central government departments, local authorities, NHS organisations, and wider public sector bodies, including HM Revenue & Customs, the Ministry of Defence, the Department for Work and Pensions, the Ministry of Justice, and UK police forces, can now use these services to improve operational efficiency, strengthen resilience, and deliver greater value for money.

Krinesh Amin, managing director of Synechron UK, said: "Securing a place on G-Cloud 15 marks

an important milestone in our UK growth strategy. Our extensive experience designing and securing critical systems across heavily regulated markets aligns seamlessly with the stringent demands of public sector digital transformation.

Krinesh Amin, Managing Director of Synechron UK

“As local and central government organisations increasingly explore AI, automation, and data-driven services, governance, cybersecurity, and operational resilience are non-negotiable. We look forward to partnering with public bodies to build modern, compliant, and defensible cloud environments that deliver lasting public value.”

Public sector buyers can find Synechron’s services through the G-Cloud 15 supplier directory on the Government Commercial Agency’s Digital Marketplace.
