growth so quickly," said Gerald Commissiong, Interim Co-CEO of DataMEDS. "With the recent launch of Tollo Health's proprietary dietary supplements and medical foods combined with strong organic growth from our growing retail customer base, we are beginning to see the growth in both prescriptions filled and adjunct product sales. We believe this represents the beginning of a growth cycle that will continue to accelerate as Corexa becomes known for dispensing and augmenting the patient experience for patients taking GLP-1 receptor agonist FDA-approved prescription drugs and the Long COVID community."

Mr. Commissiong continued, "With the recent launch of the Health Lives Here mobile application that offers Corexa Pharmacy as a fulfillment option for telehealth prescriptions, combined with the closing of the Helomics Corporation acquisition that opens up potential demand for oncology-based medications and nutritional support products, we believe that Corexa Pharmacy is well positioned for future growth. We are also in the process of upgrading the physical location of Corexa Pharmacy to serve as the flagship model for our Health Lives Here initiative with NFL Alumni Health. Corexa Pharmacy will be showcased as a model for other pharmacies within Corexa Health's over 6,500 independent pharmacy network, comprised of physical retail locations that are seeking to expand into patient service centers to better help manage the large population of GLP-1 receptor agonist consumers and Long COVID patients."
