Supreme Wraps Announces New Peoria, Arizona Location, Expanding Fleet Vehicle Wrap Services Across Phoenix's West Valley

PEORIA, AZ, UNITED STATES, September 10, 2026 / EINPresswire.com/ -- Supreme Wraps, a nationally recognized automotive restyling and paint protection brand, today announced the opening of Supreme Wraps Peoria, a new veteran-owned franchise location serving Peoria and the greater Phoenix West Valley.

Supreme Wraps Logo

Located at 8945 W. Larkspur Dr., Peoria, Arizona, Supreme Wraps Peoria is owned and operated by Chad Teegardin, a United States Marine veteran, and specializes in paint protection film (PPF), color paint protection film, vehicle wraps, ceramic window tint, commercial vehicle wraps and fleet graphics.

The new location expands Supreme Wraps' Arizona presence while bringing the company's automotive protection, customization and commercial branding services closer to customers throughout Peoria, Glendale, Surprise, Sun City, Sun City West and neighboring West Valley communities.

"Peoria is an important market for Supreme Wraps, and having Chad lead this location makes the expansion especially meaningful," said Steven Mandala, founder of Supreme Wraps. "He brings the discipline, accountability and leadership developed during his service in the Marine Corps into the business. We want Supreme Wraps Peoria to become the destination in the West Valley for customers who care about protecting, customizing and properly maintaining the appearance of their vehicles."

Supreme Wraps Peoria can be reached at 480-692-2295.

A Veteran-Owned Automotive Restyling Business Serving Peoria, Arizona

Supreme Wraps Peoria is independently owned and operated by franchisee Chad Teegardin, making the Peoria location a veteran-owned automotive business in Peoria, Arizona.

Teegardin's background as a Marine veteran is closely aligned with Supreme Wraps' focus on process, accountability, quality control and attention to detail.

The company views those attributes as particularly important in automotive restyling, where an installation can involve the removal and reinstallation of trim, careful surface preparation, complex film application and precise finishing around body panels, sensors, cameras and exterior components.

Commercial Fleet Wrap

Lamborghini in Apterix PPF

"For me, this business is about standards," Teegardin said. "The Marine Corps teaches you that details matter, preparation matters and the quality of the work reflects on the entire team. That same mentality carries directly into how we want to operate Supreme Wraps Peoria. We want our customers to know their vehicles are being treated with care and that we stand behind the work leaving our shop."

Supreme Wraps Peoria is positioned to serve both individual vehicle owners and commercial customers throughout the West Valley.

What Services Does Supreme Wraps Peoria Offer?

Supreme Wraps Peoria offers professional paint protection film, color PPF, car wraps, ceramic window tint and commercial fleet wraps in Peoria, Arizona.

The shop serves customers seeking both vehicle protection and complete visual transformation.

Ferrari Wrapped in Yellow Apterix Color PPF

Services include:

Paint Protection Film (PPF): Clear or specialty protective film applied over painted vehicle surfaces to help protect against rock chips, road debris, scratches and everyday environmental exposure.

Color Paint Protection Film: Protective film that changes the exterior appearance of a vehicle while simultaneously adding a thicker protective barrier over factory paint.

Vehicle Wraps: Full and partial vinyl wraps that allow vehicle owners to change color, finish or styling without permanently repainting the vehicle.

Ceramic Window Tint: Premium automotive window film designed to reduce solar heat entering the cabin, improve comfort and create a cleaner exterior appearance.

Commercial Vehicle Wraps: Custom graphics and branding for business vehicles, including cars, trucks, vans and trailers.

Fleet Graphics: Multi-vehicle branding programs for companies operating service, delivery, transportation or commercial fleets.

Each service can be performed individually or combined as part of a more comprehensive vehicle transformation.

Professional Paint Protection Film Installation in Peoria

Paint protection film has become one of the most widely requested services for owners of new, luxury, exotic, electric and performance vehicles.

Supreme Wraps Peoria offers professional PPF installation in Peoria and the Phoenix West Valley, including partial-front, full-front and full-body protection packages.

PPF creates a nearly transparent sacrificial layer between the vehicle's original paint and common road hazards.

Areas such as the front bumper, hood, front fenders and mirrors are frequently exposed to rocks and debris during highway driving, making them common locations for paint damage.

A front-end PPF package can help protect these high-impact areas, while a full-body PPF installation extends protection across most painted exterior surfaces.

For many customers, installing PPF shortly after purchasing a new vehicle is part of preserving its appearance and reducing visible wear over time.

APTERIX Paint Protection Film Available at Supreme Wraps Peoria

Supreme Wraps Peoria offers APTERIX paint protection film systems for customers seeking advanced protection and appearance options.

The Supreme Wraps network uses APTERIX products for clear, matte and color PPF applications.

Clear PPF allows customers to retain the original factory color while adding a protective layer over the paint.

Matte or satin protection film can change the appearance of a factory gloss finish while continuing to provide surface protection.

Color PPF allows for the most significant transformation, combining the visual effect of a color change with the protective properties associated with paint protection film.

This range of options gives Peoria vehicle owners the ability to choose a solution based on whether their priority is preserving the original paint, changing the finish or completely changing the exterior color.

Color PPF Offers an Alternative to Traditional Car Wraps

One of the principal services offered at Supreme Wraps Peoria is color paint protection film, also known as color PPF.

Color PPF is increasingly being selected by vehicle owners who previously would have chosen between a traditional vinyl wrap and clear paint protection film.

Traditional vinyl vehicle wraps are primarily designed to change a vehicle's appearance.

Color PPF can change the appearance while adding a substantially more protective outer layer over the original painted surface.

That difference has made color PPF particularly attractive for newer or higher-value vehicles where the owner wants both customization and paint protection.

Supreme Wraps offers APTERIX color PPF in a broad selection of colors and finishes, giving customers considerably more personalization options than are available directly from most vehicle manufacturers.

"Color PPF changes the conversation," Mandala said. "A customer no longer has to look at customization and protection as two completely separate decisions. They can select a color they really want and protect the factory finish underneath at the same time."

Tesla PPF and Color PPF in Peoria

Supreme Wraps Peoria expects Tesla vehicles to represent an important part of the local market.

The shop provides Tesla PPF, Tesla color PPF, Tesla wraps and ceramic window tint in Peoria, including services for the Tesla Model 3, Model Y, Model S, Model X and Cybertruck.

Tesla owners frequently turn to aftermarket customization because the number of factory exterior colors is limited compared with the much broader color selection available through specialty films.

A Tesla Model Y, for example, can be transformed with a satin, matte, gloss or specialty color while adding paint protection through color PPF.

Cybertruck owners can similarly use specialty films to create a distinct appearance or customize portions of the vehicle.

Supreme Wraps has extensive experience working with Tesla vehicles throughout its network, including complete color transformations, clear paint protection film and tint packages.

Serving Luxury, Exotic and Performance Vehicles

In addition to Teslas and daily-driven vehicles, Supreme Wraps frequently works with luxury, exotic and high-performance automobiles.

Customers with vehicles from manufacturers such as Porsche, Ferrari, Lamborghini, McLaren, Mercedes-Benz, BMW, Corvette, Range Rover, Rivian and Aston Martin often use PPF to preserve paint condition or color PPF to create a more personalized appearance.

These vehicles can require a higher degree of installation precision because of complex body shapes, carbon-fiber components, aerodynamic surfaces, sensors and specialized trim.

Supreme Wraps' installation philosophy emphasizes proper preparation and finishing rather than simply applying film as quickly as possible.

For a customer entrusting a high-value automobile to a shop, the installation process can be as important as the film itself.

Ceramic Window Tint for Arizona Drivers

Arizona's heat and intense sunlight make automotive window tint an important service for Peoria-area drivers.

Supreme Wraps Peoria offers ceramic window tint in Peoria, Arizona, for customers seeking increased cabin comfort and improved heat rejection.

Ceramic automotive film is designed to reduce solar heat entering a vehicle while maintaining optical clarity.

For Arizona residents, vehicles can remain exposed to intense sunlight for extended periods while parked or driven throughout the day.

Reducing incoming solar energy can help make the cabin more comfortable and reduce the workload required to cool the interior after the vehicle has been sitting outside.

Customers can select tint levels appropriate for their goals and applicable Arizona regulations.

Ceramic window tint can also be combined with paint protection film or color PPF as part of a complete vehicle protection package.

Commercial Vehicle Wraps and Fleet Graphics for Peoria Businesses

Supreme Wraps Peoria is not limited to consumer automotive customization.

The location also provides commercial vehicle wraps and fleet graphics for Peoria businesses and companies throughout the West Valley.

Commercial vehicle graphics allow businesses to transform cars, pickup trucks, vans, trailers and

fleet vehicles into mobile advertising.

A professionally wrapped service vehicle can display a company's logo, services, phone number, website and brand identity while traveling between customers and job sites.

Businesses that operate multiple vehicles can use standardized fleet graphics to create a consistent visual identity across their entire operation.

Supreme Wraps works with commercial clients in industries including home services, construction, transportation, logistics, municipalities, dealerships and other businesses that rely on branded vehicles.

Projects can range from basic door graphics and identification lettering to partial wraps and full commercial vehicle transformations.

Why Businesses Invest in Fleet Wraps

Fleet wraps give businesses repeated visibility in the areas where they actually operate.

A plumbing, HVAC, roofing, electrical or construction company serving Peoria and Glendale, for example, can generate local brand impressions every day as its vehicles travel through neighborhoods and commercial areas.

Unlike many forms of advertising, the branded vehicle remains visible whether it is driving, parked at a jobsite or sitting in traffic.

Supreme Wraps Peoria can assist companies with designing, producing and installing commercial graphics across individual vehicles or larger fleets.

The goal is to create branding that is easily recognizable and consistent from one vehicle to another.

Why Paint Protection Is Especially Relevant in Arizona

Arizona presents a challenging environment for vehicle exteriors.

Drivers regularly encounter dust, loose road material, highway debris and construction zones, while vehicles also experience prolonged exposure to intense sunlight.

Rock chips and road debris can damage vulnerable painted surfaces, particularly on the front bumper and hood.

PPF creates a physical barrier designed to absorb much of that everyday impact before it

reaches the factory-painted surface.

Full-body paint protection film can also help owners preserve a more uniform finish across the vehicle.

For Peoria residents who frequently travel on Loop 101, Loop 303, Interstate 10 or other Phoenix-area highways, protecting high-impact areas may be particularly important.

Supreme Wraps Expands Across the Phoenix Metropolitan Area

The Peoria opening expands Supreme Wraps' presence across Arizona and strengthens the company's ability to serve customers on both sides of the Phoenix metropolitan area.

Supreme Wraps already operates in the Arizona market through Supreme Wraps Scottsdale, while the new Peoria location creates a dedicated destination for customers throughout the West Valley.

The Peoria franchise is part of Supreme Wraps' broader strategy to build a network of professional automotive restyling locations in growing U.S. markets.

The company is focused on markets with strong vehicle ownership, expanding populations and demand for premium automotive protection and customization.

The West Valley meets each of those criteria.

Supreme Wraps Peoria is located at 8945 W. Larkspur Dr., Peoria, AZ and serves customers throughout the surrounding region.

Primary service areas include:

Peoria
Glendale
Surprise
Sun City
Sun City West
Northwest Phoenix
Goodyear
Avondale
Buckeye
The greater Phoenix West Valley

Customers from elsewhere in metropolitan Phoenix can also schedule projects with the Peoria location.

“Veteran ownership means something to us beyond putting a label on the business,” Mandala said. “The values that Chad developed through the Marine Corps—discipline, service, leadership and accountability—are exactly the values you want inside a business where customers are handing you the keys to vehicles that may be some of their most valuable possessions.”

Teegardin said his objective is to establish the Peoria shop as a trusted long-term resource for both consumers and businesses in the West Valley.

“We're building this location to become part of the Peoria community,” Teegardin said. “Whether somebody is bringing us a new family SUV, a Tesla, an exotic car or a fleet of commercial trucks, the expectation should be the same: professional service, clear communication and work completed to a high standard.”

Frequently Asked Questions About Supreme Wraps Peoria
Is Supreme Wraps Peoria veteran owned?

Yes. Supreme Wraps Peoria is a veteran-owned franchise operated by Chad Teegardin, a United States Marine veteran. The location serves Peoria, Arizona and communities throughout the Phoenix West Valley.

Where is Supreme Wraps Peoria located?

Supreme Wraps Peoria is located at 8945 W. Larkspur Dr., Peoria, Arizona.

What is the phone number for Supreme Wraps Peoria?

Customers can contact Supreme Wraps Peoria at 480-692-2295 to discuss paint protection film, color PPF, vehicle wraps, ceramic window tint or commercial vehicle wraps.

Where can I get paint protection film in Peoria, Arizona?

Supreme Wraps Peoria provides professional paint protection film installation in Peoria, Arizona, including partial-front, full-front and full-body PPF packages.

Does Supreme Wraps Peoria install color PPF?

Yes. Supreme Wraps Peoria installs color paint protection film, allowing vehicle owners to change their vehicle’s exterior color while simultaneously protecting the original painted surface.

Does Supreme Wraps Peoria wrap Teslas?

Yes. Supreme Wraps Peoria provides PPF, color PPF, vinyl wraps and ceramic tint for Tesla Model

3, Model Y, Model S, Model X and Cybertruck vehicles.

Does Supreme Wraps Peoria install window tint?

Yes. The Peoria location provides ceramic automotive window tint for cars, SUVs, trucks and other passenger vehicles.

Can Supreme Wraps Peoria wrap business vehicles?

Yes. Supreme Wraps Peoria provides commercial vehicle wraps and fleet graphics for businesses throughout Peoria and the Phoenix West Valley.

What areas does Supreme Wraps Peoria serve?

Supreme Wraps Peoria serves Peoria, Glendale, Surprise, Sun City, Sun City West, northwest Phoenix and surrounding West Valley communities.

What is the difference between color PPF and a vinyl wrap?

A vinyl vehicle wrap is primarily intended to change the vehicle’s appearance. Color PPF changes the appearance while also providing a thicker protective film layer designed to help protect factory paint from rock chips, scratches and road debris.

Can PPF an entire vehicle?

Yes. Customers can choose protection for high-impact areas or select full-body paint protection film to cover most painted exterior surfaces.

Is paint protection film worth considering for a new car in Arizona?

Many Arizona vehicle owners choose PPF because it can help protect vulnerable painted surfaces against rockhighway debris, scratches and other everyday road exposure. The appropriate level of coverage depends on the vehicle, driving habits and the owner's goals.

About Supreme Wraps

Supreme Wraps is an automotive restyling and paint protection brand specializing in paint protection film, color PPF, vehicle wraps, ceramic window tint and commercial fleet graphics.
