High Performance Systems Corp Expands Specialized Commercial Kitchen Flooring Services Across New Jersey

High Performance Systems Corp Expands Specialized Commercial Kitchen Flooring Services Across New Jersey

Best Epoxy Restaurant Flooring

MIDDLESEX, NJ, UNITED STATES, September 10, 2026 / EINPresswire.com/ -- High Performance Systems Corp, a leader in industrial and commercial seamless flooring solutions since 1988, today announced the expansion of its high-performance epoxy and urethane flooring services tailored specifically to commercial kitchens, restaurants, and food service operations throughout New Jersey.

Designed to meet strict USDA and FDA hygiene standards, the company's seamless resinous flooring systems withstand severe thermal shock from hot oil and washdowns, frequent chemical sanitation, and heavy foot traffic—providing a non-porous, slip-resistant surface that eliminates bacteria-harboring joints.

To assist restaurant owners, facility managers, and commercial kitchen operators, High Performance Systems Corp has highlighted dedicated service hubs tailored to local hospitality and food processing demands:

Statewide Commercial Kitchen Services: Serving food service operators statewide, the Commercial Kitchen Flooring NJ team provides heavy-duty urethane concrete coatings, slope-to-drain systems, and thermal-shock-resistant surfaces for institutional kitchens, cafeterias, and food manufacturing facilities.

Urban Hospitality & Restaurant Hubs: Targeting the densely populated dining corridor of Hudson County, the Hoboken Restaurant Kitchen Flooring division delivers fast-curing, low-odor resinous coatings engineered to minimize downtime for high-volume restaurants, bars, and bistros.

North Jersey Commercial Corridors: Expanding local coverage in Bergen County, the Paramus Commercial Kitchen Flooring team installs durable, easy-to-clean flooring solutions for shopping centers, catering halls, and commercial dining venues across the region.

Commercial Kitchen Floor Systems

"Commercial kitchen floors face extreme conditions every single day—from hot grease spills to aggressive daily chemical cleanings," said Jeffrey Smedley, President of High Performance Systems Corp. "Our seamless urethane and epoxy systems are engineered to prevent moisture penetration and bacterial growth while providing the durability and slip resistance necessary to keep staff safe and operations compliant."

Every project handled by High Performance Systems Corp includes detailed substrate preparation—such as mechanical diamond grinding and shot blasting—to secure maximum adhesion and long-term durability.

About High Performance Systems Corp

Founded in 1988, High Performance Systems Corp is a commercial contractor specializing exclusively in seamless epoxy, urethane mortar, and concrete coating installations. Operating across New Jersey, New York, Pennsylvania, and the Mid-Atlantic, the company delivers high-durability floor systems for industrial and commercial facilities.
