New IT Risk Assessment Webinar Series Announced - ISO27001 and the Importance of Risk Management

/EINPresswire.com/ [Vigilant Software](#), the information security risk management solutions provider, has today announced a new webinar series: ISO27001 and the Importance of Risk Management. This series will take attendees on a learning journey to carry out an information security risk assessment when implementing an [ISO27001](#)-compliant information security management system (ISMS).

The short, educational and informative webinars are split into four steps. Free and open to all, they will be presented by expert compliance practitioner Alan Calder, who will explain what ISO27001 is and why it is important, how to carry out a risk assessment and details on updating and maintaining an existing risk assessment.

The webinars are aimed at anyone who is or will soon be involved in ISO27001 compliance, in particular risk management.

Using the risk assessment tool, [vsRisk](#)™, the webinars will demonstrate how software is transforming the information security compliance industry, removing the fear and hassle of the more traditional risk assessment methods.

The webinars:
• Why ISO27001 for my Organisation? – Thursday February 28th
• The Importance of Risk Management – Thursday March 7th
• Carrying out a Risk Assessment using vsRisk – Thursday March 14th
• Maintaining and updating your existing risk assessment using vsRisk – Thursday March 21st

Details including abstracts and registration can be found at www.vigilantsoftware.co.uk/webinars.aspx.
