TOPSUN Showcases EU-Compliant Silicone Leather at LINEAPELLE 2026, Hall 15 – Stand P10

Formaldehyde-free, PFAS-free materials on display as two EU chemical regulations take effect weeks before the Milan fair.

TOPSUN silicone leather in lychee grain — multiple colors available for visitors to evaluate at Hall 15, Stand P10

TOPSUN's silicone leather lamination line — solvent-free production equipment at the company's factory

SHENZHEN CITY, GUANGDONG PROVINCE, CHINA, September 14, 2026 /EINPresswire.com/ -- TOPSUN Silicone Leather Co., Ltd. will exhibit its formaldehyde-free and PFAS-free silicone leather at LINEAPELLE 2026, held September 15–17 at Fieramilano Rho in Milan, Italy. Visitors will find TOPSUN at Hall 15, Stand P10, where the company presents materials that meet the EU's recently tightened chemical regulations without reformulation, Helping European brands avoid costly material re-qualification and supply chain disruption.

LINEAPELLE, held since 1981, ranks among the world's most important leather exhibitions, gathering more than 1,100 exhibitors from 40 countries and visitors from 112 nations. This year's fair opens weeks after two EU regulations took effect: REACH Annex XVII Entry 77, limiting formaldehyde emissions to 0.062 mg/m³ from 6 August, and the Packaging and Packaging Waste Regulation (PPWR) per- and polyfluoroalkyl substances (PFAS) restrictions at 25 ppb per substance from 12 August.

TOPSUN produces silicone leather through a solvent-free dry-coating process that introduces no

formaldehyde crosslinkers and no PFAS coatings. The material has passed REACH Substances of Very High Concern (SVHC) screening for over 200 restricted substances and holds ISO 10993-5 biocompatibility certification. At Hall 15, Stand P10, TOPSUN will display its full product range for furniture, automotive interiors, and consumer electronics applications.

At Stand P10, TOPSUN will present silicone leather across multiple texture patterns — including lychee, silk, and smooth finishes — in over 40 standard colors. The company will also showcase its silicone PET leather line for wall panel and consumer electronics housings, along with materials certified to FAR 25.853 for aircraft interiors and EN 13773 for furniture flame retardancy.

According to independent market research, the global silicone synthetic leather market is projected to grow from USD 270 million in 2025 to USD 620 million by 2034, representing a 9.0% compound annual growth rate. Tightening chemical regulations in Europe and North America are accelerating demand for inherently compliant materials across furniture, automotive and medical sectors.

Visitors to LINEAPELLE 2026 can meet TOPSUN's team at Hall 15, Stand P10 during the three-day fair. Buyers can also request compliance documentation and product samples through TOPSUN's eco-friendly silicone leather page.

About TOPSUN Silicone Leather Co., Ltd.

TOPSUN, established in 2018, specializes in the R&D, manufacturing, and sales of silicone vegan leather with an annual capacity of 6 million square meters. Our products hold ISO, REACH, PAHs, FAR, and FDA certifications, featuring eco-friendly, infant-safe, antimicrobial, stain-resistant, weather-proof, abrasion-resistant, and inherently flame-retardant properties. We serve industries including furniture & sofa, automotive interiors, baby & kids, 3C accessories, fashion & sports, medical & healthcare, and marine & outdoor.
