

Tracking Your Teen's Cell May Not Be Effective Lifeguard GPS Offers Teen Tracking So Parents Can Stop Worrying

/EINPresswire.com/ Dallas, TX -- There is much you may not know about tracking your teen's cell phone. Many parents feel they are safely "keeping tabs" on their teen through cell [phone tracking apps](#), while a vehicle GPS tracking system may be more effective and often less expensive.

"Cell phone tracking apps can be easily controlled by a 'crafty teen.' All they need to do is turn the phone off just before they go to a potentially dangerous party," says Patrick Locke, Manager of LifeGuard GPS.

Furthermore, there are often accuracy issues with cellular tracking apps. In many phones, position is calculated through a process called cellular triangulation, which uses cell phone towers to pinpoint location and not the Global Positioning System. If you have ever experienced bad cell service or a dropped call, it is easy to understand how errors can occur with cell tracking apps. Cell phone tower issues have often resulted in phone tracking apps showing a teen's position miles away from their actual location.

Many cell phone tracking apps sound high-tech, but, in actuality, they are easily bypassed, not incredibly reliable, and usually provide a location only upon request. Installing LifeGuard's NFT-4550 or NFT-OBID device in your teen's vehicle is the best and most accurate way to locate where a teen is at, where they have been, and how fast they are driving.

LifeGuard GPS provides the complete package needed to help protect a son or daughter. The devices are affordable and simple to install, ranging from 5 seconds to 25 minutes, depending on which device is purchased. Once installed, the parent is able to view locations, speeds, and stops from any computer, tablet, or smart phone that is internet enabled. The system also includes a maintenance package that helps track regular maintenance including oil changes, state registrations, tire rotations, and much more. When any maintenance item entered is due, the parent will be notified by text or email.
