GCLS Launches Perceptors AI: Agentic Learning System for Healthcare Education

The Geneva College of Longevity Science launches Perceptors AI, an agentic LMS targeting mass-scale clinical certification across 100+ institutions globally.

GENEVA, SWITZERLAND, September 14, 2026 /EINPresswire.com/ -- The Geneva College of Longevity Science (GCLS), through its GCLS AI Lab, today announced the global launch of Perceptors AI (www.perceptors.ai), an agentic learning management system (LMS) engineered to democratize high-standard clinical and longevity education.

> We built Perceptors AI to be the distribution engine that educators have been waiting for. It allows to deploy full, agentic certification pathways that meet the rigorous standards of modern medicine."
>
> *Dominik Thor*

Over 100 institutions are currently leveraging Perceptors AI infrastructure to train healthcare teams on AI application and longevity sciences. With a clear roadmap for expansion, the platform is targeting significant scale across Southeast Asia, Brazil, India, Mexico, the GCC, and European markets.

As healthcare systems worldwide face an urgent need for rapid AI adoption and standardized training, conventional LMS often fall short in providing the necessary clinical rigor, evidence-based personalization, and scalability. Perceptors AI is built to change this, acting as the critical infrastructure for institutions—universities, hospital systems, and professional bodies—to deliver expert-led curriculum, secure assessment, and evidence-grounded AI tutoring at a transformative scale.

"The challenge of training the next generation of healthcare providers isn't just about content; it's about infrastructure," said Dominik Thor, Founder and President of GCLS. "We built Perceptors AI to be the distribution engine that clinical educators have been waiting for. It allows institutions to move beyond simple video-based learning and deploy full, agentic certification pathways that meet the rigorous standards of modern longevity and AI-augmented medicine."

Infrastructure for Institutional Scale
Perceptors AI solves the "last-mile" problem of clinical education by combining:
 Agentic Personalization: An evidence-grounded AI tutor provides real-time, context-aware support, helping learners navigate complex clinical material without overwhelming faculty resources.

 Institutional Scalability: A robust backend that enables health networks to launch standardized certification programs across diverse regions simultaneously.
 Academic Integrity: Unlike generic LMS platforms, Perceptors AI embeds clinical assessment engines that ensure learners meet strict proficiency standards before progressing.

“We are giving clinical educators a platform that finally matches the rigor of the material they teach,” said Omar Saleem, MD, and Fady Hannah-Shmouni, MD, Co-Founders of the GCLS AI Lab. “Perceptors ensure that every course, whether taken by one student or one hundred thousand, carries the same academic standards our physician advisors hold us to. We’ve designed this for a future where high-quality clinical education is accessible regardless of geography.”

Availability and Deployment
Perceptors AI is available immediately for healthcare institutions, life-sciences organizations, and educational networks worldwide. The platform features transparent, per-learner pricing designed to support mass-market adoption without the burden of hidden infrastructure or upgrade fees.
Institutions interested in launching a certification program can request a technical briefing or platform demonstration at www.perceptors.ai.

About Perceptors
AI Perceptors AI is the agentic learning management system developed by the GCLS AI Lab to help healthcare organizations turn expert knowledge into rigorous, scalable learning experiences. The platform combines curriculum, assessment, and an evidence-grounded AI tutor in one place, so clinicians learn faster and organizations can prove the impact of their training. Learn more at www.perceptors.ai.

About the Geneva College of Longevity Science (GCLS) GCLS is the academic institution behind Perceptors AI and GCLS AI Lab, offering professional education across longevity science, preventive healthcare, precision health, and clinical practice for working healthcare professionals. Learn more at www.gcls.ai and www.gcls.study
