

PISTEVO, INC. SIGNS BUSINESS DEVELOPMENT AGREEMENT WITH JOHN FANNING, FOUNDER AND CEO OF NAPSTER

/EINPresswire.com/ Orlando, FL (Submitpressrelease123.com - press release) [Pistevo, Inc.](#) announced today that the company has entered into a Business Development Agreement with John Fanning, Founder/CEO of Napster and NetCapital.com. Under the Business Development Agreement the website Reper.com, an online reputation defender, will utilize Pistevo's background search services as a compliment to their already existing platform.

Reper was recently called a Yelp for people by KillerStartups.com. Users can track a person's reputation, write reviews, comment on other people's reviews, or post anonymously. It is free to launch a search on Reper.com and the site's database provides an extensive source of user generated information. By adding background search services from Pistevo, the website gains another layer of credible reputation insight.

"As people becoming more visible on the Internet, protecting one's online reputation has become pivotal. The addition of Pistevo's services to Reper.com, gives our customers instant access to check anyone out," states John Fanning, Co-Founder of Reper.com. Continuing Flanning adds, "There are many companies going after what is clearly a massive market for the future. An individual's reputation and background information is becoming increasingly digital and increasingly in high demand. Very few relationships begin these days without some type of background due diligence. Pistevo's platform seems robust and gives you a leg up on most of the others I have seen to date."

Pistevo provides its customers with free downloadable apps for iPhone, iPad and Android devices. Searching over 400 million records, Pistevo offers fast, accurate and cost effective searches for as little as \$2.99.

Mark Songer, CEO of Pistevo, commented, "We are elated to have signed Reper.com as part of the Pistevo family. John brings us an incredible amount of experience in both business and technology. I am personally excited to work with one of the most prodigious tech visionaries in the world today."
