

New Jersey Trade Show Installation And Design Firm Introduces New Energy Efficient LEDs

/EINPresswire.com/ Skyline Exhibits has introduced new LED lights that can be added to any [trade show exhibit in New Jersey](#). These energy-efficient and cost-effective lights will save exhibitors money and draw attention to their booths.

PINE BROOK, NJ - [New Jersey trade show booth](#) and exhibit designer, Skyline New Jersey is marketing Skyline Exhibits' newly introduced Wall Washer LED lamp to replace halogen lamp lights. Previously, halogen lights have been the go-to solution for booth lighting, but Skyline is attempting to move towards more energy and cost saving methods of exhibiting. The LED lights are accepted in every trade show and event venue, including Las Vegas.

Three new LED models were created in order to fit every booth and exhibiting need. One 70w Skyline Ceramic Metal Halide (CMH) light is almost twice as bright as a 200w halogen light, and can be used for longer distances. Fewer fixtures also reduce exhibiting costs up to 80%. The CMH lasts approximately 20,000 hours, 10 times longer than a standard halogen.

The new 24w LED Arm Light rivals the brightness of the older 200w halogen light but will provide many more benefits to any trade show exhibit in New Jersey. Although its lumen output is less than half of the halogen bulb, it uses 88% less energy. The LED arm lights last over 30,000 hours compared to 2,000 hours for halogens. The color temperature is 4,500 kelvins, shining whiter and brighter than halogens without compromising the color of the graphics. This light is a great option for smaller displays, but works in larger displays as well.

The new LED Telescope lights for table tops and banner stands are a great option for portable booths. The small and lightweight telescope fixtures are extremely durable. The Skyline 6.5w LED bulbs use 87% less energy than the 50w halogen lights. They also pack quicker, as the LED lights are always cool to the touch, even while on.

"Skyline has always focused on quality and efficiency. These three new lights further support those efforts. Thanks to the new LED lamps, exhibiting will be easier, more cost effective and

affordable. Best of all, the new lights are suitable for any size or type of booth which means anyone can take advantage of these efficient new lights," noted Scott Price of Skyline New Jersey (www.skylinenj.com).

Going green is only one of the many benefits to making the switch from halogen to LED lamps. For even more information how to make the switch, contact the [New Jersey trade show installation](#) and design firm directly by calling 973-882-3488.
