

iPad Live Dealer Games on the Rise

/EINPresswire.com/ Live dealer casino games are now being offered for play on iPads and for UK residents may also be found in Apple's App Store.

Live dealer casino games are now being offered for play on iPads and for UK residents may also be found in Apple's App Store.

[Live casino gaming](#) has been steadily growing in popularity in Europe over the last five years or so as a traditional web offering. The games are played online but take place in a real physical environment (purpose built studio or bricks and mortar casino) and outcomes are determined by traditional casino equipment rather than random number generators. The dealers, cards, roulette wheels, balls and dice are all real, as they would be in a terrestrial casino. The key difference here is that the deal is live streamed to players' computers allowing them to play the games remotely.

To date this remote play has largely taken place on personal computers but now a growing number of online casinos are beginning to offer live dealer games purpose built for play on iPads. Additionally, January 2013 saw two iPad Apps which include live dealer games added to Apple's App Store (presently for UK residents only).

Industry leading platforms like Evolution Gaming are aggressively entering the iPad space. Their [live roulette for iPad](#) is already up and running, live [baccarat](#) and blackjack for iPad have been promised to be launched in coming months. Playtech likewise have enabled licensee bet365 to launch their live dealer games as an App in the (UK) App store.

It seems clear that the live games landscape is set to change considerably throughout 2013 as more developers and operators join the rush to make their games iPad friendly.
