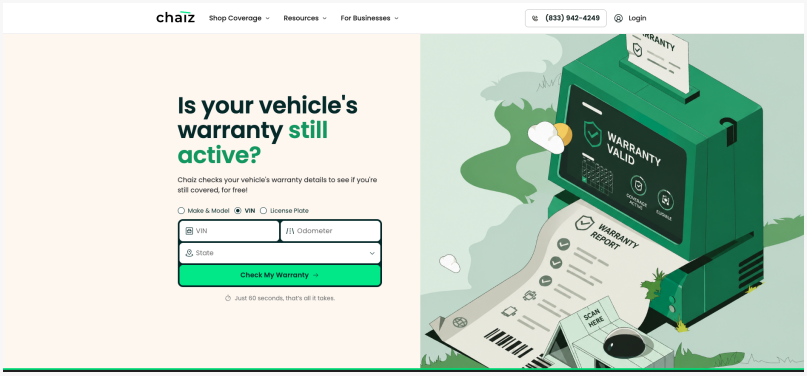
Chaiz Launches Free Tool That Tells Drivers Exactly When Their Warranty Runs Out

New tool at chaiz.com tells drivers whether their factory warranty is still active — and what to do next — in under a minute, with zero personal info required.



Chaiz Launches Free VIN-Based Warranty Lookup Tool

AUSTIN, TX, UNITED STATES, September 16, 2026 / EINPresswire.com/ -- Most drivers don't know their factory warranty has expired until they're staring at a repair bill. Chaiz, an online marketplace for vehicle service contracts (VSCs), is closing that gap with the launch of its VIN Warranty Check tool — a free resource that tells drivers in seconds whether their coverage is still active, and shows them personalized extended-warranty options if it's not. No obligation, no pressure.

Available now at chaiz.com/warranty, the tool asks for nothing more than a vehicle's 17-character VIN, mileage, and state. Because drivers don’t provide their phone numbers or email addresses, they can utilize the warranty checker without having to worry about spam.

Quick, easy to use, and accurate, Chaiz’s VIN Warranty Check Tool provides a clear answer without drivers having to hunt for it. All vehicle owners need to do is enter their VIN (found on the dashboard, driver-side door jamb, insurance card, or title) into the tool, and Chaiz’s system will instantly identify the exact make, model, and trim.

Within seconds, drivers get an accurate picture of their coverage standing and a side-by-side look at plans from Chaiz's network of vetted providers. They can then compare quotes, and if they decide to purchase, they move directly to Chaiz’s secure online checkout.

Chaiz reports that customers can save up to 60% on vehicle protection by comparing plans through its marketplace rather than purchasing directly from a single provider or dealership.

"Most people have no idea when their factory warranty actually runs out, and by the time they

find out, it's often too late to get affordable coverage," said Ryan Hartman, CMO and Cofounder at Chaiz. "We built this tool so anyone can get a straight answer in under a minute, on their own terms, without a sales call."

The tool reflects Chaiz's broader focus on making extended vehicle coverage easier to understand and shop for. Alongside spam-free VIN-based lookup, Chaiz provides information including:
- a plain-language breakdown of how factory (OEM) warranties differ from third-party extended warranties (VSCs), including coverage scope, repair locations, deductibles, and transferability
- answers to common questions about waiting periods, deductibles, pre-existing conditions, and repair shop choice
- coverage options from verified providers including Toco, Omega, Zurich, Endurance, American Guardian Warranty Services, Capital Auto Protection Services, and others
- make-specific warranty information pages covering dozens of manufacturers, from mainstream brands to luxury and specialty makes

Coverage is not currently available in California; eligibility varies by vehicle age, mileage, and condition.

About Chaiz
Chaiz is an online marketplace that enables drivers to compare and purchase vehicle protection plans directly. By aggregating multiple providers on a single platform, Chaiz provides transparency in pricing and terms, allowing consumers to make informed decisions regarding long-term vehicle maintenance costs without facing dealership sales tactics.

Chaiz is rated 4.7 stars on ConsumerAffairs, holds an A+ rating with the Better Business Bureau, and is rated "Excellent" on Trustpilot.
