

www.nessbo.com is a new, free search engine designed for the electronic component industry and trade.

/EINPresswire.com/ www.nessbo.com search engine enables purchasing managers to find parts easily and view prices from every source, combined on a [single screen](#). As well as major distributors, the search engine includes parts from independent suppliers, as well as from OEMs and EMSs with excess inventory, resellers and local distributors, and even manufacturers who sell direct to end users.

As for ease of use, www.nessbo.com eliminates the drudge work of having to send RFQs and sort through the replies. Its built-in algorithm can mine data (such as P/N, QTY, MFG) from any file format, even a simple email.

Registered clients may search amongst reputable franchised distributors and independent distributors at no cost. Among those franchised distributors are ARROW; MOUSER; VERICAL; FARNELL; RS COMPONENTS; FUTURE ELECTRONICS; AVNET; ELEMENT14; NEWARK. Including all their subsidiaries, and at least 30 additional others.

The www.nessbo.com search engine has been designed and developed after many years of research and collaboration between key people from the electronic component commerce and R&D people from the software Industry. Through these combined efforts, www.nessbo.com has achieved the vision it strived for, a high performance and an optimal user interface. Working with the system is easy, intuitive, user friendly and free.
