

ISO27001 Certified ISMS Lead Implementer Online course in March offers the fastest learning route

/EINPresswire.com/ [IT Governance](#), the global information security and ISO27001-compliance experts, have reported that only four weeks remain until their highly successful ISO27001 [Certified ISMS Lead Implementer](#) Online training course goes live. Due to high demand for qualified information security professionals, places on this interactive live-online course are filling in quickly. Find out more at www.itgovernance.co.uk/shop/p-714.aspx.

Alan Calder, who leads course and is also the CEO of IT Governance, says, "The percentage of booking on our ISO27001 Lead Implementer course has almost doubled in the last few months. So many organisations are currently implementing an information security management system or looking to achieve ISO27001 certification that the need for skilled implementers is growing fast.

Our ISO27001 Certified ISMS Lead Implementer course is one of the longest-running courses on the market with an enviable history of high-calibre attendees from all sectors and industries. Since we launched the live-online version, we've managed to reach delegates globally who can't or don't want to make the journey to London or Manchester, but prefer to take the course from the convenience of their own home or office."

Course attendees benefit from a recognised industry-standard certification awarded by the International Board for IT Governance Qualifications ([IBITGO](#)) if they pass the voluntary examination which is taken online on the last day of a three-day training programme. They also receive a free copy of the book IT Governance: An International Guide to Data Security and ISO27001/ISO27002, which is a valuable accompanying resource for their implementation project.

Bookings on the live-online course can be made immediately online at www.itgovernance.co.uk/shop/p-714.aspx.
