# IT Governance launches PCI Implementation Training Course

/EINPresswire.com/ [IT Governance Ltd](#), the PCI DSS compliance experts, have launched their PCI DSS Implementation training course, which will be delivered both in London and Manchester. This two-day course is essential for individuals who are responsible for ensuring that their organisation becomes fully compliant to the technical and business requirements of the PCI DSS. Bookings can be made online at [www.itgovernance.co.uk/shop/p-1279.aspx](http://www.itgovernance.co.uk/shop/p-1279.aspx).

Alan Calder, CEO of IT Governance, says, "Every organisation that stores, transmits or processes card holder data must comply with the PCI DSS and, logically, they need PCI experts to see them through the compliance process. The content of our course reflects the level of technical and business understanding that delegates need to gain in order to meet the requirements of the standard. This course represents exceptional value for money — we believe its interactive format, quality of content and the expertise of the trainer, who is a PCI Quality Security Assessor, cannot be matched by any other PCI advanced course."

The PCI DSS Implementation training course uses practical examples and real-life case studies to guide delegates through a proven methodology designed to ensure that they select the correct 'route to compliance', identify the exact requirements using gap analysis and create an effective implementation plan.

This course also features the use of IT Governance's unique [PCI DSS Documentation Toolkit](#) which provides all of the documentation templates for the mandatory PCI DSS policies, implementation guidelines and guidance on integrating with ISO27001 - the international standard for an information security management system.

Places on the [PCI DSS Implementation course](#) can be booked online at [www.itgovernance.co.uk/shop/p-1279.aspx](http://www.itgovernance.co.uk/shop/p-1279.aspx).
