Horton Automatics Launches EasyLearn Online Training Program for Commercial Door Professionals

Online training course helps distributors, architects and building managers gain expertise in automatic and manual door systems with certificate of completion.

Horton Automatics

LEWISVILLE, TX, UNITED STATES, September 17, 2026 / EINPresswire.com/ -- Horton Automatics, a leading manufacturer of automatic pedestrian doors, announces the launch of EasyLearn, a new online training program designed to help industry professionals build knowledge and strengthen their understanding of commercial door applications, standards, and best practices.

Developed for distributors, architects, facility managers, and other commercial door professionals, EasyLearn provides a comprehensive learning path covering automatic and manual door technologies through a series of focused educational modules.

Participants who successfully complete all 11 modules and pass the final assessment earn an EasyLearn Certificate of Completion, recognizing their commitment to professional development and expanded knowledge of commercial door systems, industry standards and best practices.

The new training program features 11 modules exploring key industry topics, including:

- Sliding doors
- Healthcare door systems
- Swinging and folding doors
- Revolving doors
- Activation and sensing technologies
- ADA and universal design principles
- ANSI standards
- Daily safety checks

> EasyLearn was created to make industry knowledge more accessible while helping professionals build confidence in the products, standards, and applications they encounter every day."
>
> *Elias Campos, Vice President of Marketing at Horton Automatics*

- iSpecifyIt® and product selection resources

Elias Campos, Vice President of Marketing at Horton Automatics, comments:

"Education plays a critical role in designing, specifying, installing, and maintaining safe, effective door solutions. EasyLearn was created to make industry knowledge more accessible while helping professionals build confidence in the products, standards, and applications they encounter every day.

"The Certificate of Completion provides participants with a tangible way to demonstrate the time and effort they've invested in expanding their expertise."

The curriculum introduces users to major commercial door categories, door operation concepts, power classes of automatic doors, activation and sensing technologies, accessibility considerations, and relevant industry standards. The self-paced format allows participants to advance through the coursework on their schedule while reinforcing practical knowledge that can be applied in the field.

EasyLearn is part of Horton's ongoing commitment to supporting customers, distributors, and industry partners with educational resources that promote safer, more informed decisions throughout the building lifecycle.

Distributors, architects, facility managers and other industry professionals can begin the EasyLearn course by visiting: https://www.hortondoors.com/easylearn-course/
