

# Trinity Consultants Names Industry Leaders for Chemical and Oil & Gas Sectors

/EINPresswire.com/ [Environmental consulting](#) experts appoint Ms. Inaas Darrat, PE, to lead the Chemical sector and Mr. Ron Truelove to manage Oil & Gas efforts.

Trinity Consultants, an international environmental consulting firm that specializes in industrial [air quality issues](#), recently appointed two senior consultants to lead its efforts in the chemicals and oil and gas industries. Inaas Darrat, PE, will lead chemical sector services and Ron Truelove will manage oil and gas industry efforts. The new roles enhance the extensive support that Trinity has provided to companies in both sectors for nearly 40 years.

Ms. Darrat will be focusing her team's efforts on challenging environmental issues in the chemical sector, such as the EPA's enforcement initiatives (e.g., LDAR and flare), consent decree negotiation and compliance assistance, and the new Chemical Manufacturing Area Sources (CMAS) rule, as well as compliance management around other applicable federal regulations—including the NSPS, HON, MON, OLD, and BWON rules. Ms. Darrat has assisted chemical facilities for more than a decade with [air permitting](#) and compliance management. She is particularly well-known for her expertise on Leak Detection and Repair (LDAR) requirements across industries and the flare initiative. Ms. Darrat teaches several professional training courses for the chemical sector on requirements under various NESHAPs, as well as fugitive emissions and LDAR.

Mr. Truelove will direct Trinity's efforts related to the recent expansion in the upstream and midstream oil and gas sectors, as well as new air regulations such as the oil and gas new source performance standard (NSPS Subpart OOOO). Formerly an EH&S manager for a large exploration and production company for more than a decade, Mr. Truelove is also an experienced consultant who understands the industry's process as well as environmental challenges. His team is actively supporting many oil and gas producers of all sizes with new applicable requirements as well as permitting associated with expansion.

Both industry teams are under the direction of Shishir Mohan, Trinity's Managing Director in the Gulf Coast and South regions. According to Mr. Mohan, "Clients in both industry sectors will be well-served with Trinity's enhanced focus and new team leaders. Both Inaas and Ron are technically strong and excellent project managers. Perhaps even more importantly, they are

positioned to pull together the best team to serve the client's needs, no matter where that expertise is located within Trinity."

#### About Trinity Consultants

Trinity Consultants operates in more than 30 U.S. locations and in China and the Middle East. In addition to extensive air quality permitting and compliance support, Trinity also markets BREEZE® environmental modeling software, implements technology solutions for EH&S information management, and provides professional EH&S training, EH&S staffing services, and toxicology/industrial hygiene for pharmaceutical companies.
