Blast No Dust Announces Mobile Eco-Friendly Wet and Dry Sandblasting Solutions for Commercial and Residential Clients

Mobile sandblaster Blast No Dust expands in West Central FL with custom eco-friendly wet & dry blasting for cabinets, machinery, fleet & masonry.

Blast No Dust

PORT RICHEY, FL, UNITED STATES, September 20, 2026 / EINPresswire.com/ -- Blast No Dust, LLC, a specialized surface preparation contractor, today announced the official expansion of its mobile sandblasting services across West Central Florida. Operating from Port Richey, the company delivers specialized on-site surface restoration, paint removal, and rust remediation using both wet (dustless) and traditional dry abrasive blasting techniques tailored specifically to commercial, residential, and B2B clients throughout Pasco, Pinellas, and Hillsborough counties.

To meet diverse project requirements, Blast No Dust provides flexible blasting methods depending on surface material, coating thickness, and job site parameters. For projects where dust control is paramount, the company utilizes advanced wet abrasive blasting technology, which mixes water with non-toxic abrasive media at the nozzle to suppress airborne dust by up to 92 percent compared to traditional methods. For heavy industrial coatings, specialized steel prep, or moisture-sensitive applications, Blast No Dust performs traditional dry sandblasting using eco-friendly, 100 percent silica-free abrasives to ensure operator and site safety without compromising blasting efficiency.

Equipped with onboard power and water supplies, the company's fully self-contained mobile

units operate directly at job sites, including residential driveways, active commercial facilities, industrial yards, cabinet remodeling sites, and local marinas.

"Offering both wet and dry mobile surface preparation allows us to tailor the exact method to the client's specific needs—whether that means suppressing dust near a residential home or utilizing dry silica-free blasting on heavy industrial steel," said a spokesperson for Blast No Dust. "By utilizing eco-friendly, non-toxic media across all operations, projects proceed safely and efficiently on-site without transporting heavy equipment to an off-site facility."

Surface Restoration

Specialized Sector Services Offered:
Commercial & B2B Solutions: Heavy machinery stripping, fleet maintenance, industrial coating removal, shipping container restoration, and structural steel rust remediation using eco-friendly dry or wet blasting.

> Offering both wet and dry mobile surface preparation allows us to tailor the exact method to the client's needs using eco-friendly, silica-free abrasives."
>

Residential & Interior Restoration: Precision paint, stain, and sealer removal for cabinet remodeling, kitchen wood trim, concrete driveways, pool decks, brick pavers, stone patios, and structural masonry.

Automotive, Marine & Special Applications: On-site paint and rust stripping for classic car frames, commercial fleet trucks, heavy equipment, cabinet refinishing prep, and anti-fouling bottom paint removal on boat hulls at local docks.

Blast No Dust offers complimentary on-site consultations and project estimates for commercial, industrial, and residential clients throughout Port Richey, Clearwater, Tampa, St. Petersburg, and surrounding West Central Florida municipalities. Additional service details can be accessed at www.blastnodust.com.
