ISO27001 Lead Auditor course provides 'an excellent learning environment' say attendees

/EINPresswire.com/ The ISO27001 <u>Certified ISMS Lead Auditor</u> Training Course from ISO27001-compliance experts <u>IT Governance</u>, is a four and a half day intensive course designed to prepare attendees with how to plan and execute audits of information security management systems (ISMS); in line with the international standard, ISO/IEC 27001. There are a few places remaining on the course on 11-15 March in London and bookings can be made online here <u>www.itgovernance.co.uk/shop/p-712.aspx</u>.

IT Governance is an established and respected specialist training provider. The ISO27001 Certified ISMS Lead Auditor Training Course is well known for its high quality practical content and the expertise of the trainers. Delegates have described the course as 'very well structured' and 'very interesting'. They have said that it 'provides excellent learning environment' and leads to 'complete confidence in taking and passing the Lead Auditor exam'.

The London-based ISO27001 Certified ISMS Lead Auditor Training Course provides delegates with a world-class certification awarded by gasq, and is approved by the International Board for IT Governance Qualifications (<u>IBITGQ</u>).

Alan Calder, CEO of IT Governance, says, "The growing number of organisations pursuing ISO27001 certification means that the skills of a Lead Auditor will become increasingly sought after. Whilst training for a Lead Auditor offers excellent career prospects, professionals need to be more selective in terms of the training provider to ensure they get value and quality."

ISO27001 requires the organisation to have its implementation of its information security policy independently reviewed. Whilst an internal audit function is essential, ideally the organisation will have access to an appropriately qualified ISO27001 ISMS Lead Auditor. The Lead Auditor will plan and oversee the entire internal audit process and will have a team that are deployed to conduct the audits.

The Certified ISO27001 Lead Auditor Training Course is ideal for organisations that have to train staff in order to maintain compliance with the ISO27001 standard. Qualified Lead Auditors can ensure that their company's cybersecurity defences are adequate enough to combat cyber threats and that their Information Security Management System (ISMS) is up-to-date.

The Certified ISO27001 Lead Auditor Training Course gives delegates valuable insights into designing, leading and delivering cost-effective and value-generating ISO27001-compliance audits. It is delivered by both experienced auditors and active practitioners in the field of ISO27001 and information security, bringing unique insight into auditing. Priced at just £1,195+VAT, this four and a half day course is well suited for ISO27001 Lead Implementers who are looking to progress their career.

Bookings onto the course can be made online at <u>www.itgovernance.co.uk/shop/p-712.aspx</u>.
