

ForDogTrainers.com Adds Dog E-Walk Premium Trainer and Anti-Pulling Device to New Line of Products

/EINPresswire.com/ ForDogTrainers.com has added to its range of products [Anti-pulling device](#) and [Dog E-walk premium trainer](#) that effectively discourage a dog from pulling on a leash with the help of harmless ultrasound. The result is an obedient dog that is a real pleasure to walk.

ForDogTrainers is the leader in selling dog training equipment online. The company ships to more than 80 countries all over the world. ForDogTrainers.com is happy to announce that it has expanded its already wide range of products and now any dog owner or professional dog trainer can purchase online additional necessities for daily dog training and walking as well.

It is no secret that daily dog walks can be so much fun and still many dog owners can't really say they enjoy this activity. It concerns especially those people who have large and medium size breeds. It often happens that a dog pulls so hard that it is difficult to tell who walks whom. Any dog must know who is the owner. Dog E-walk premium trainer and Anti-pulling device are ready to solve the problem. Both these devices help to stop pulling on a leash without causing any harm to a dog and to correct a dog's behavior. Dog E-walk trainer and Anti-pulling device work simple: they produce ultrasound that is harmless but irritating enough. The harder a dog pulls the louder the sound. Note! Ultrasound is not perceived by a human ear, so no one around will notice you use it. These gears effectively discourage a dog from pulling and tugging on a leash. Eventually, your dog will have strong association that pulling is bad. Training will be much more effective, you can use E-walk trainer as remote controller. Note! The signal has an operating distance of around 30 feet. Make sure you are within this distance. These products were developed and patented in Germany. This country produces nothing but high quality long-lasting reliable products.

Briefly about each item and its features.

Dog E-walk premium trainer is designed for dog training and walking. Total control over your pet

and absolute attention are guaranteed. Its key characteristics are following:

- 4 levels of intensity
- "plus" and "minus" options to control the signal
- easy in use
- safe for a dog
- doesn't attract attention of a passersby
- easily attached to leashes and collars
- works as a remote trainer

Anti-pulling device will improve quality of daily walking with a pet. It has characteristics of the kind:

- simple in use
- a dog immediately reacts to the signal
- harmless for a pet
- easily fastened to a leash and a collar or a walking harness
- adjustable tone level for custom training

One look will let potential users know how effective and handy these devices can be.
