Real Time Medical Systems to Spotlight Data Approaches for Strengthening Quality, Accountability, and Compliance at IHCA

Clinical expert will share how skilled nursing teams can turn EHR data into an operational advantage for survey preparedness and continuous improvement

Real Time Medical Systems

BALTIMORE, MD, UNITED STATES, September 21, 2026 / EINPresswire.com/ -- Baltimore, MD, September 21, 2026 – Real Time Medical Systems (Real Time), the industry-leading, KLAS Rated, HITRUST r2 Certified, and SOC 2 Compliant post-acute care analytics solution, announced today its participation in the Illinois Health Care Association (IHCA) 76th Annual Convention & Expo, taking place September 21–23, 2026, in East Peoria, IL. As long-term care leaders navigate increasing resident complexity, staffing constraints, and evolving regulatory expectations, Real Time will highlight how live clinical data can help organizations maintain visibility into facility-wide performance, identify emerging risks, and support quality and compliance priorities.

Contributing to the IHCA educational agenda, Cheryl Scalzo, RN, Customer Success Manager at Real Time, will present Leverage Live Data to Maintain a Culture of Care, Communication, and Compliance on Tuesday, September 22, 2026, from 10:15–11:15am CT. The session will explore how skilled nursing facility teams can utilize real-time data within the EHR to enhance Quality Assurance and Performance Improvement (QAPI) efforts, monitor population-level trends, streamline regulatory reporting, and evaluate whether quality improvement initiatives are delivering meaningful clinical outcomes.

“Compliance is often viewed as something organizations prepare for, when in reality it's the result of thousands of clinical decisions, actions, and follow-through taking place across a facility every day,” said Cheryl Scalzo. "Clinical standards only create value when they’re consistently applied and continually evaluated in practice. Real-time visibility into live clinical data helps teams recognize high-risk patterns sooner, verify that processes are working as intended, and intervene before small issues become larger challenges.”

Heading to the IHCA Convention & Expo? Join Real Time for Cheryl Scalzo’s educational session

and stop by the exhibit hall to learn how post-acute providers are using AI-enabled healthcare analytics to transform EHR data into actionable clinical insights that help identify resident risk earlier, support quality improvement initiatives, and streamline regulatory compliance – while reducing administrative and regulatory burden.
