# Novudentics Becomes First Dental Office to Issue Patients a Dental Passport

*Royal Palm Beach prosthodontics practice gives every patient a portable, patient-owned record of their treatment, health history, insurance and implants*

ROYAL PALM BEACH, FL, UNITED STATES, September 21, 2026 /EINPresswire.com/ -- Novudentics, the prosthodontics and implant dentistry practice of Serafeim Kallithrakas, DDS, MS, has become the first dental office to distribute a Dental Passport to its patients. The Dental Passport is a secure, patient-owned record that travels with the patient rather than staying locked in one office's software.

Most dental records still live inside the practice management system of whichever office created them. When a patient moves, sees a specialist, or needs a second opinion, the history is requested by fax, re-entered by hand, or simply lost. Implant patients feel this most: the manufacturer, size and placement date of an implant are needed for the rest of the patient's life, and are the details most often missing when a new dentist takes over care.

The Dental Passport, built by Intake Dental, changes who holds the record. Each Novudentics patient receives their own passport, linked to their chart at the practice. As treatment happens, the passport is kept current with completed procedures, the tooth chart, radiograph history, an implant registry with manufacturer and placement details, health history, medications and allergies, insurance coverage, signed consents, and a care plan. The patient decides which offices can see it and can share it with any dentist, in or out of the network, with a link or a scan.

Patients can also add family members as dependents, request records from previous offices directly from the passport, review a log of every access to their information, and carry the passport in Apple Wallet for check-in at participating practices.

"Prosthodontic and implant work is a long relationship, and the patient should never have to reconstruct it from memory," said Dr. Serafeim Kallithrakas, founder of Novudentics. "A patient who leaves our office with a Dental Passport carries their implant details, their history and their treatment plan with them, wherever they go next. That is how it should have always worked."

"Every other industry has moved records to the person they belong to. Dentistry has not," said Dr. Jordan Thomas, DMD, founder of Intake Dental. "Novudentics is the first office to hand the record to the patient, and we expect a lot of offices to follow."

The Dental Passport is free for patients. Practices issue passports through Intake Dental, which connects to the office's existing practice management software so the passport stays current without extra work for the front desk.

About Novudentics
Novudentics is a prosthodontics, cosmetic and implant dentistry practice in Royal Palm Beach, Florida, led by Serafeim Kallithrakas, DDS, MS. The practice serves patients from Royal Palm Beach, Wellington, West Palm Beach, Delray Beach, Boynton Beach, Boca Raton and surrounding Palm Beach County communities.
