

Breakthrough Spinal Treatment Now Available In Dallas

/EINPresswire.com/ Chiropractor Serving Dallas And Plano Offers Complimentary Spinal Analysis

Premier Health Clinic Chiropractic And Wellness today announced that it will offer those who live or work in the North Dallas and Plano areas a complimentary ProAdjuster spinal analysis. The analysis helps to pinpoint problem areas and determine how the ProAdjuster Ultralign G2 system can help. Through March 9, 2013 first-time visitors also will receive a complimentary computerized posture analysis. This is done to detect abnormalities in relation to pain syndromes, body function and overall health. The offer is not valid for patients using Medicare.

Dr. H. Khayal said, "Imagine forty years ago if you were told that lasers would replace scalpels in surgery or that robotic instruments would build cars; you may not have believed it. By the same token, would you believe that chiropractic treatments could be performed using a special hand-held instrument developed by NASA scientists, all while you were sitting in an upright position without any turning or twisting movements?"

According to Dr. Khayal, "This new form of computerized treatment is so gentle and effective, that it amazes even the most skeptical patients. It's called the ProAdjuster Ultralign G2 system and is the latest, state-of-the-art technology in existence today, and the only one in the Dallas area."

The ProAdjuster Ultralign G2 system can safely and gently analyze and treat the spine and other joints to remove the nerve impingement that is often the cause of pains in the low back, neck, shoulder and elsewhere in the body. It also works on a variety of muscular conditions to loosen tight muscles with ease and comfort. Many patients say that it's like getting a mini-massage. Even patients with knee, hip and foot problems such as plantar fasciitis are being helped. It is also covered by most insurance companies including Medicare.

Dr. Khayal said, "The secret to the ProAdjuster lies in its ability to deliver an extremely precise adjustment." "Even though traditional forms of adjusting also work," he continued "people are drawn to this new technique because of how gentle it is and does not involve any twisting, especially in the neck."

"Many people love getting adjusted with traditional manual techniques, all of which are safe and

effective. But there are a large number of people who never get to experience the amazing benefits of chiropractic because they are scared to have their spines adjusted in that way," said Dr. Khayal. "Now, there is no longer a reason to be weary. The ProAdjuster is perfect for anyone who has been thinking about going to a chiropractor, but hasn't yet made that decision. I want everyone to be able to experience these same benefits and if you have any of the following conditions, the ProAdjuster may be the answer you've been seeking."

The conditions he cited included low back pain, fibromyalgia, sciatic pain, plantar fasciitis, neck and shoulder pain, scoliosis, TMJ, arthritis, Carpal Tunnel Syndrome, sports injuries, headaches, knee pain and hip pain. According to Khayal treatment with the ProAdjuster Ultralign G2 system is consistent, measurable and extremely gentle; and it may allow people to no longer live with a painful, persistent condition.
