Real Time Medical Systems to Share Strategies for Reducing SNF Rehospitalizations with Post-Acute Analytics at LifeSpan

Best practices and AI-driven clinical insights to help skilled nursing providers recognize warning signs, support treatment-in-place, & reduce hospitalizations

Real Time Medical Systems

BALTIMORE, MD, UNITED STATES, September 22, 2026 / EINPresswire.com/ -- Baltimore, MD, September 22, 2026 – Real Time Medical Systems (Real Time), the industry-leading, KLAS Rated, HITRUST r2 Certified, and SOC 2 Compliant post-acute care analytics solution, announced today its participation in the LifeSpan Network 2026 Annual Conference & Expo, taking place September 22–25, 2026, in Ocean City, MD. As Maryland's long-term care community convenes to discuss innovation, quality, and operational excellence, Real Time will share how live AI-driven analytics can help providers turn clinical data into actionable intelligence, enabling more informed decision-making and stronger resource prioritization.

During the conference, Lindsey Ford, RN, Network Program Manager at Real Time, will present the session, Best Practices, Strategies & Tools to Avoid Skilled Nursing Facility Rehospitalizations, on Tuesday, September 22, 2026, from 11:30am–12:30pm ET. Attendees will gain practical insight into the impact of readmissions on resident outcomes, facility performance, and reimbursement, while exploring strategies for integrating real-time clinical intelligence into routine care processes.

"Avoidable hospital transfers are rarely the result of a single event. More often, they stem from clinical, operational, or communication challenges that emerge well before a resident is rehospitalized," said Lindsey Ford. "The opportunity for providers is to recognize those patterns sooner and respond before a higher level of care becomes necessary. When teams can translate live clinical data into action within their daily workflow, they are better positioned to allocate resources effectively, strengthen interdisciplinary collaboration, and create greater consistency throughout the organization."

Attending the LifeSpan Conference? Visit Real Time at Booth #34 and attend Lindsey Ford's presentation for real-world perspectives on addressing common drivers of hospital transfers,

supporting treatment-in-place efforts, and applying post-acute analytics and real-time clinical insights to everyday decision-making. We look forward to connecting with you in Ocean City!
