Business Continuity Management Toolkit offers fast route to ISO22301 compliance and saves on consultancy fees

/EINPresswire.com/ IT Governance, the business continuity and ISO22301 compliance experts, have reported that their ISO22301 Business Continuity Management Documentation Toolkit is cheaper than half a day with a consultant, whilst providing professionals with knowledge and tools to implement a business continuity management system (BCMS) compliant with the ISO22301-standard. More information is available at www.itgovernance.co.uk/shop/p-1039.aspx.

Alan Calder, Chief Executive of IT Governance, says: "Organisations deploying a BCMS are better prepared to respond to natural disasters and other unforeseen events than those without an integrated business continuity programme. They are demonstrating to customers and other stakeholders that the organisation is fully prepared for disruptive incidents, and are able to resume business quickly, providing a reliable service.

"Using our ISO22301 BCMS Documentation Toolkit not only means you can accelerate your implementation project, but can also significantly reduce costs by deploying best practice and avoiding wasteful trial-and-error methods. The toolkit helps you apply continual improvements and ensure your organisation stays ahead of the curve."

Developed by a business continuity expert and practitioner, the ISO22301 BCMS Documentation Toolkit contains document templates and guidance that enables implementers to quickly and efficiently produce their own tailored versions of all essential documents.

It comes with a unique document support service which enables users of the tool to get answers to documentation queries within 24 hours – and at no extra cost. There is also a free updating service meaning that organisations will benefit from 12 months of updates to the toolkit, again at no extra cost.

Organisations can order the ISO22301 BCMS Documentation Toolkit online at www.itgovernance.co.uk/shop/p-970.aspx.
