

Russian Satellite Destroyed by Chinese Space Junk

/EINPresswire.com/

March 11, 2013 /EIN News/--In 2007, the Chinese destroyed one of their own orbiting satellites with an experimental anti-satellite weapon. Now, the junk from that incident has collided with and destroyed a small Russian satellite. NASA estimates that there are hundreds of thousands of pieces of debris in space orbit, many large enough to damage functioning satellites, and even the space station.

EIN News, a leading media monitoring company, links to an article about space collision at:
